- Student Affairs
- North Dakota University System
- Gordon B. Olson Library
- Center for Extended Learning
- Registrar's
- Advancement
- Human Resources
- Administration and Finance
- Graduate School

Preface

Mission Statement

The Office of Academic and Institutional Projects (AIP) at Minot State University supports the university's planning and decision-making efforts so that the university can fulfill its larger mission. The office responds to requests from constituencies of the university in order to support decision making, assessment, policy analysis, effective management, projections and planning. It also responds to requests for information from outside agencies and other institutions and generates annual Factbooks and reports showing trends and comparisons to the North Dakota University System.

The goals of AIP are to ensure that reports and analyses are accurate, timely and useful to Minot State University administrators, faculty, students, and staff. To guarantee that the mission is carried forward, the director and coordinator work carefully to ensure that files dealing with student course and personnel data are as accurate and consistent as possible.

AIP of Minot State University is pleased to present the 2009 Fact Book. This is an annual and cumulative production providing an ongoing view of trends and documents areas of growth and development, diversity and challenge.

Cari A. Olson, MS, - academic and institutional projects coordinator

Source: North Dakota University System Office: 2009 Fall Enrollment Report <http://www.ndus.edu/uploads/document-library/1785/FALL-2009-ENROLLMENT-FOR-NEWS--RELEASE.PDF>

Data Source: North Dakota University System. Headcount is the total number of students enrolled regardless of the number of credit hours. NDUS reports the headcount as the number of students enrolled on the 4th week of classes in the term.

¹ "Enrollment at some institutions includes students who were registered, but had not made payment or been granted an extension based on documented good cause as of the census date. This includes 24 students at NDSU, 40 students at UND, 71 students at NDSCS and 239 students at LRSC for a total of 374 students." (Creating a University System for the 21st Century, 2007 Fall Enrollments, November 2007, p. 1)

* FTE/Total refers to full-time equivalent of total credit hour reduction (Total undergraduate credit hours divided by 16 or Total graduate credit hours divided by 12.). "Total credit hours" is the number of credit hours the full-time and part-time students enrolled in. <http://www.csgnetwork.com/percentchangeCalc.html> FTE Numbers were calculated by dividing total credit hours from first table by 15 for undergraduates and by 12 for graduates. Prior to 2006, the calculation was 16 for undergraduates and 9 graduates.

Minot State University
*Student Enrollment Highlights: FTE/Total**
2006-2009

The calculations are based upon 15 credit hours for full-time undergraduate students and 12 credit hours for graduate students.

Data Source: NDUH2SRE Major Minor Reports by College Provided by Registrar's Office

Note: For declared majors for 2005-06, PeopleSoft data replaced the Legacy system. PeopleSoft did not allow for "PRE" programs so students had to choose majors in related fields. **Starting in Spring 2005 the data includes 2nd majors.** Graduate students are included in the totals for communication disorders, criminal justice, elementary education, management, mathematics and music in 05-06 as the data had been historically tabulated this way.

Percent Change Dale Gehring- Financial Aid Services

Tuitions and fees are for on-campus courses. The tuition and fees charged for most on-campus courses cap at 12 credits. Distance education courses do not cap at 12 credits, charges are calculated on all credits. In addition to the tuition and fees listed above, all distance courses will be charged an additional fee.

Distance education courses are charged an additional access fee. The access fee is a per credit charge to a student to cover the added costs associated with delivery of a course. The fee varies from \$5 per credit for Bismarck courses to \$42.50 per credit for online courses. Undergraduates may take up to 18 credits before an additional fee is charged. Graduate credits are capped at 12 credits for the tuition noted above.

*The 2004-2007 tuition rates include the ConnectND fee.

A full-time student, for tuition purposes, is a person who is enrolled in 12 or more semester hours of credit. The cost of tuition and fees for part-time enrollments is prorated. Some distance education courses pay per credit. These courses are not part of the 12 credit cap for charges.

** Western Undergraduate Exchange Enrollment. In 2005-06, states that are a member of WUE include: Alaska, Arizona, California, Colorado, Hawaii, Idaho, Nevada, New Mexico, Oregon, Utah, Washington, and Wyoming. Montana is also a member of WUE, but Montana students receive the contiguous states tuition.

MSU Student Activity Fee Distribution: 2004-2009

The student activity fee is included in the amounts stated on the previous page. The per-semester fee for full-time students is separated into two portions: the University Fee and the Student Government Activity Fee. The University Fee supports activities that benefit the student body as a whole, while the Student Government Activity Fee goes toward supporting specific activities. The tables below provide a breakdown of the allocation of these fees. These are charged per semester.

Information Technology Central (ITC)

FACTBOOK: Technology at Minot State University (Revised 12/15/09)

Information Technology (IT) is a strategic necessity for Minot State University. Fundamental tools (e-mail, calendaring, file sharing, Web access, etc.) are important for administrative, academic, and research functions and day-to-day operations. High-speed networking, high-performance computing, collaboration voice and data tools and other advanced technology services create innovative opportunities for the institution.

A reliable and redundant network infrastructure is the backbone on which all other services depend. IT infrastructure refers to the entire technology architecture that supports student, faculty, and staff computing activities on campus and from a distance. Components that make up the current technology architecture include, but are not limited to, switched and routed network backbone, wireless Internet access, production support servers and appliances (email/calendaring, voicemail integration, file and print, backup, Web, network support, directory services, authentication, firewall, filtering/bandwidth management, intrusion detection, patch management, antivirus gateway, spam filtering, remote access control, rapid application deployment, network/application resource monitoring, and secure network access).

The migration from a 100 Mbps dual-ring fiber backbone began in 2001 and was completed in phases over the next four years. Prior to the upgrade, FDDI edge switches provided 10 Mbps desktop connections to campus labs, residence halls and faculty and administrative offices. Today, all edge switches support 10/100 Mbps and, in some cases, 10/100/1000 Mbps to the desktop.

The network core infrastructure is the key component to support expanding technology development across campus. The wired network needs to remain a reliable, robust, and secure transport system to meet the needs of the campus community and support access to the latest voice, data, and video technology. Currently, the campus backbone supports full layer three gigabit Ethernet with plans to upgrade cores switches to 10 gigabit Ethernet summer 2009.

MSU participates in STAGENet, the state-funded wide area network (WAN) consortium. Early WAN connectivity was limited to one T1 capable of 1.544 Mbps. The T1 connection was upgraded to a fractional DS3 (10 Mbps) in 2000. In early 2007, the campus WAN connection was upgraded from a DS3 (45 Mbps) to a full Gigabit Ethernet optical ring on the state network.

An Asynchronous DSL (ADSL) connection provides Internet access to the MSU's Education Office and computer lab located at Minot Air Force Base. This lab supports courses offered through the Center for Extended Learning.

A critical component of the current and future technology infrastructure is security. In the past, access to computing and network resources was maintained in a relatively controlled environment with minimal remote or online access. Making information available over the network has increased the risk of unauthorized access or inappropriate use of information. Data security discussions are ongoing and measures have been implemented to secure data, especially with regard to the campus document imaging system. ImageNow has alleviated the time-consuming inefficiencies of manually filing and retrieving documents for the Office of Financial Aid, Registrar's Office and Office of Enrollment Services.

User access via login and password will be required on the wireless network by fall semester 2009. The campus ID card system is designed to simplify access to services, events, and secure locations throughout campus. Security cameras are strategically located in campus buildings and outside in view of open parking lots, etc., to maximize visual security for all campus constituents. Other security and data protection initiatives in place relate to regular patching of critical systems, robust antivirus and Spam filtering, and reliable archives (real-time offsite storage, disk-to-disk-to-tape) of important data in the event of hardware or application failure. The Notifind emergency notification system is in place effective fall 2008 to ensure timely notifications to all faculty, staff, and students in the event of an emergency.

Information technology is an important component of the instructional and learning experience and is integral to research, teaching and learning. MSU supports over 350 computers in 12 general access and teaching labs on campus and at the Minot Air Force Base Education Center. Software for campus labs is distributed and maintained from a common set of software images using Altiris, which provides timely distribution of software images, rapid install application packages, and critical Windows and antivirus signature file updates. Numerous niche labs exist in support of specialized training for students (arts, sciences, humanities, nursing, education, business, etc.). Internet capable learning spaces and kiosks are strategically located across campus to "informally" engage students in learning opportunities. Computer systems equipped with assistive technologies including Jaws, ZoomText, 21-inch monitors, monitor lifts, etc., are available in open-access computer labs for persons with disabilities. Each student has a campus Live@Edu e-mail account, hosted by Microsoft, to receive official campus communications regarding add/drop deadlines, registration information, financial aid, campus events, emergency notifications and more. The Live@Edu account provides access to additional services including online space for file sharing and collaboration.

Students who attend Minot State University join a community of people devoted to creating and sharing information—activities that can be enhanced by information technology. Whether a full- or part-time student, living on campus or commuting, technology is available that allows for communication, personal development and getting together (in person and virtually). BlackBoard (formerly WebCT) CE 8, the campus course-management system since 1997, supports over 200 Web-based courses as well as “blended courses” in which faculty enhance their face-to-face classes with interactive online learning experiences. Six degree programs are currently available totally online. Faculty training and support are available from the Office of Instructional Technology, a fully staffed campus department (two instructional designers) formed in 2000.

Collaborative teaching tools provide an interactive and engaged teaching and learning environment for faculty and students. Microsoft Sharepoint Services creates a single-access point for faculty and students to engage in document sharing and team-based learning. Other Web-based collaboration tools are available to students and faculty including blogs and wiki sites. Maple T.A. complements the online course management system by providing Web-based testing and assessment targeted for mathematics, science, or any course that requires mathematics. An Adobe Connect meeting server is available for use by faculty and administrators to bring real-world functionality to online meetings and provide faculty and students the opportunity to communicate and collaborate instantly.

A majority of the classrooms on campus are equipped with permanently installed video projection systems and other technology enhancements. Classroom technology, whether permanently installed or delivered on demand, is available in all academic buildings. Five classroom locations have videoconferencing capability, including one room equipped with high definition. A full-time IVN coordinator provides the scheduling and daily support for all video-enabled classrooms.

IT staff register and certify the required wiring and equipment for new video-enhanced classrooms. Videoconferencing software is available for both PC and Mac computers to allow users to join a traditional IVN class in session from their home or office, thereby, bridging the “on site” requirement gap that serves as an obstacle to some.

Centralized IT staff provides support for a broad range of technology-enhanced services for faculty, staff and students. Increased availability of and access to computing resources requires equally robust support services that make it easier for all students to succeed. MSU recognizes the strong connection between the quality of education and the quality of technology services available to students. IT Central (ITC) is a centrally located service organization, comprised of a director, security coordinator, systems administrator, network operations manager, campus lab/desktop coordinator, electronics specialist, Help Desk coordinator, and Web designer/developer. In addition to working in their areas of specialization, all technicians provide desktop support and actively test and evaluate new server and network-based technologies to achieve increased flexibility and improve system responsiveness.

The Help Desk is a significant component of ITC. The office is open six days per week and is the university's first line of support relative to computer software and hardware issues, the use of instructional technology, access to server-support services and resolution of network-related problems. Help Desk services for students include hardware and software installation, equipment checkout (laptop, desktop, digital camera, projector, mini hub, etc.), removal of spyware and computer viruses, file storage, Web space, software downloads, etc. McAfee and other software are available to all students free of charge. Academic pricing for many Microsoft and Adobe/Macromedia software titles is available through a partnership with Barnes & Noble and Journeyed. Wired and wireless Internet access is available in the residence halls and across campus free of charge. There are over 1,200 active data ports and 50 wireless access points.

MSU has implemented numerous information services and systems over the past decade, transforming the way the campus engages in educational and business processes. Active directory authentication streamlines the process for rolling out new and innovative services. The Microsoft Exchange E-mail/Calendaring system continues to be a successful implementation at MSU. Voice integration will begin summer 2009 with the deployment of unified messaging (voice and e-mail messaging integration) for faculty and staff. Unified communications simplifies and improves the way employees communicate. When staff receives a voice-mail message, they can choose to access it through their e-mail client, landline, or cell phone. Staff are able to determine the sender's availability or presence and respond immediately through instant message, audio call, or video conference. Unified communications extends that same functionality to any telephone or mobile device.

Glossary

The following definitions are taken directly from the U.S. Department of Education's NCES/IPEDS Web site. For more definitions, use IPEDS Web site: <http://nces.ed.gov/ipeds/glossary/index.asp?charindex>

Degree: An award conferred by a college, university or other postsecondary education institution as official recognition for the successful completion of a program of studies.

First-year: A student who has completed less than the equivalent of 1 full year of undergraduate work; that is, less than 30 semester hours (in a 120-hour degree program) or less than 900 contact hours.

Freshman: A first-year undergraduate student.

Full-time Equivalent: A measurement equal to one student enrolled full-time for one academic year. Total FTE enrollment includes full-time plus the calculated equivalent of the part-time enrollment. The full-time equivalent of the part-time students can be estimated using different factors depending on the type and control of institution and level of student.

Full-time Student: Undergraduate—a student enrolled for 12 or more semester credits, or 12 or more quarter credits, or 24 or more contact hours a week each term. Graduate—a student enrolled for nine or more semester credits, or nine or more quarter credits, or a student involved in thesis or dissertation preparation that is considered full-time by the institution.

Graduate: A student who holds a bachelor's or first-professional degree or equivalent, and is taking courses at the post-baccalaureate level. These students may or may not be enrolled in graduate programs.

Graduation Rate: The rate required for disclosure and/or reporting purposes under Student Right-to-Know policy. This rate is calculated as the total number of completers within 150 percent of normal time divided by the revised cohort minus any allowable exclusion.

Retention Rate: A measure of the rate at which students persist in their educational program at an institution, expressed as a percentage. For four-year institutions, this is the percentage of first-time bachelors (or equivalent) degree-seeking undergraduates from the previous fall who are again enrolled in the current fall. For all other institutions, this is the percentage of first-time degree/certificate-seeking students from the previous fall who either re-enrolled or successfully completed their program by the current fall.

Undergraduate: A student enrolled in a four- or five-year bachelor's degree program, an associate's degree program or a vocational or technical program below the baccalaureate.
