

# Mixed Feelings About Assessment

Nathan Anderson, PhD  
Director of Institutional Assessment

Spring Assessment Day 2025

# Agenda

- Why do programs assess annually?
- How can *A+ Inquiry* guide assessment?
- What do faculty think about assessment?
- How do assessment & evaluation promote quality?

# Why do programs assess annually?

## Opportunity to...

generate evidence for making decisions that positively impact program quality

demonstrate to accreditors and other stakeholders that programs are thoughtfully using evidence to make intentional decisions that support program quality

# What is assessment?

The process of providing credible evidence of

- **resources**
- **implementation actions**
- **and outcomes**

undertaken for the purpose of improving the effectiveness of

- **instruction**
- **programs**
- **and services**

in higher education

(Banta & Palomba, 2015, p. 2)

# Who cares if we do assessment?

Higher Learning Commission (HLC)

3.E. Assessment of Student Learning

**The institution improves the quality of educational programs based on its assessment of student learning**

<https://www.hlcommission.org/accreditation/policies/criteria/2025-criteria/>

# How do we meet HLC assessment criteria?

## **Yearly Program Assessment (YPA)**

Annual implementation and documentation of a program's assessment plan, results, and utilization of results

# What is A+ Inquiry?

# *A+ Inquiry's* Purpose

Synthesize common stages of assessment, evaluation, research

Identify a need  
for more  
information

Formulate  
questions to  
guide a study

Collect data

Analyze data

Share results  
with  
stakeholders

Use results to  
inform  
decisions

# Alignment with Assessment Frameworks

# Absorb

- > What is already known about the context?
- > What is the knowledge gap that needs to be filled?
- > Why is it important to fill the knowledge gap?

# Ask

- > What questions, if answered, could be formulated to help fill the knowledge gap?

# Accumulate

- > What data are required?
- > Do the data need to be collected or have they already been collected?
- > What is the setting?
- > What instrument is utilized?
- > What is the collection procedure?

# Access

- > Where are the data retrieved from after they have been collected in the Accumulate stage?
- > What is the procedure for retrieving the data in preparation for analysis?

# Analyze

- > What quantitative and/or qualitative data analysis methods are implemented?
- > What tools are required to analyze the data?

# Answer

- > What are the answers to the questions that were posed in the Ask stage?
- > How do the answers relate to what was already known about the context?
- > What are limitations of the answers?
- > What are implications of the answers?

# Announce

- > Which stakeholders may benefit by being informed about the results?
- > Which answers, limitations, and implications are important to communicate to each stakeholder?
- > What is the procedure for disseminating the results to, and/or discussing the results with, the stakeholders?

# Apply

- > What decisions or actions are informed by the results that were revealed in the Answer stage?
- > Why are the decisions or actions important to implement?
- > What cautions are considered when making decisions or taking actions based on the results?

# Awareness

> Are you attentive to how a task that you are performing in one stage aligns with the other stages?

## Student Learning Outcome (SLO) Assessment

# Give it a try

## Program Outcome Assessment

Students in Dr. Datta's INQ 490 course write a capstone paper with an instrument section relevant to quantitative data collection. Dr. Datta scores the instrument section of each student's paper on a 4-point scale using the Disciplined Inquiry Capstone Project Rubric. A score of 3 or above represents success. Dr. Datta submits a score for each student in an online form. The scores are automatically compiled in a spreadsheet upon submission. \*

# Absorb

## Known:

- BS Disciplined Inquiry program
- Student Learning Outcome (SLO) 3.1:  
Develop a plan for collecting  
quantitative data.
- Target: 80% achieve success in  
describing a data collection  
instrument in their plan

## Not known:

- Extent to which SLO 3.1 is being  
achieved

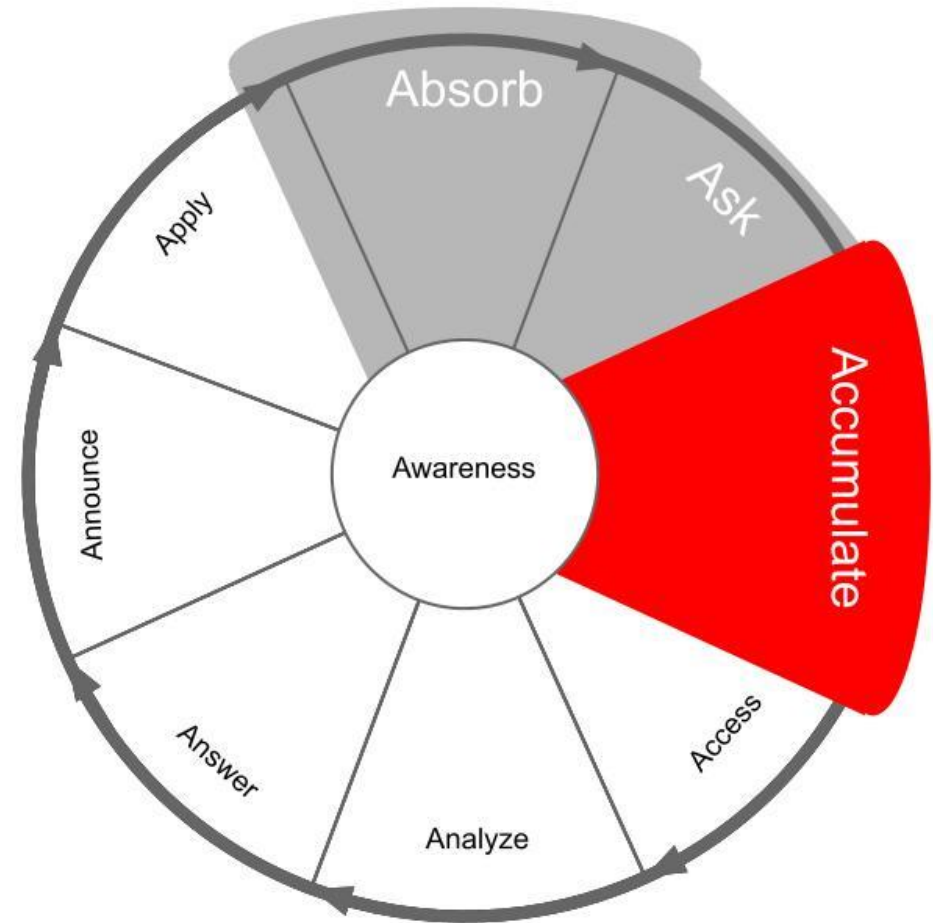

# Ask

> To what extent is the target being achieved?

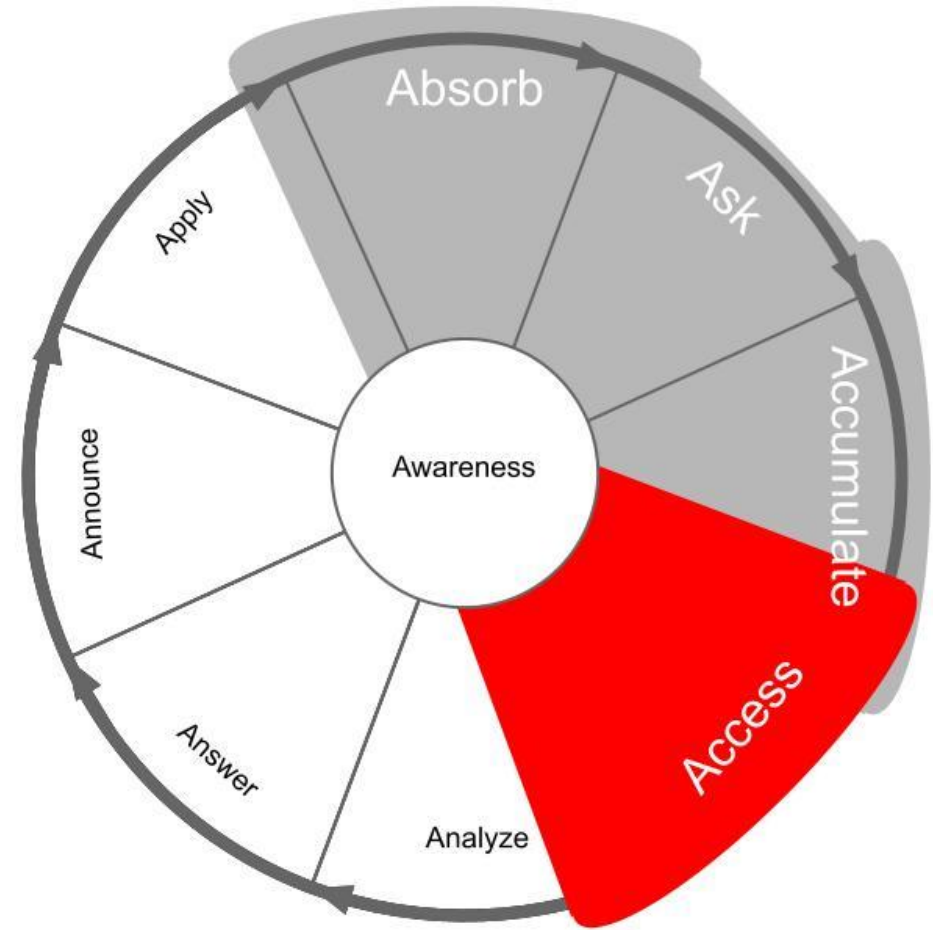

# Accumulate

- INQ 490 course
- Students write a capstone paper with a quantitative data instrument section
- Score the instrument section on a 4-point scale using the Disciplined Inquiry Capstone Project Rubric
  - Score of 3 or above represents success
  - Submit a score for each student in an online form
  - Scores are automatically compiled in a spreadsheet upon submission

# Access

- Retrieve the rubric scores from the spreadsheet where the scores were automatically stored

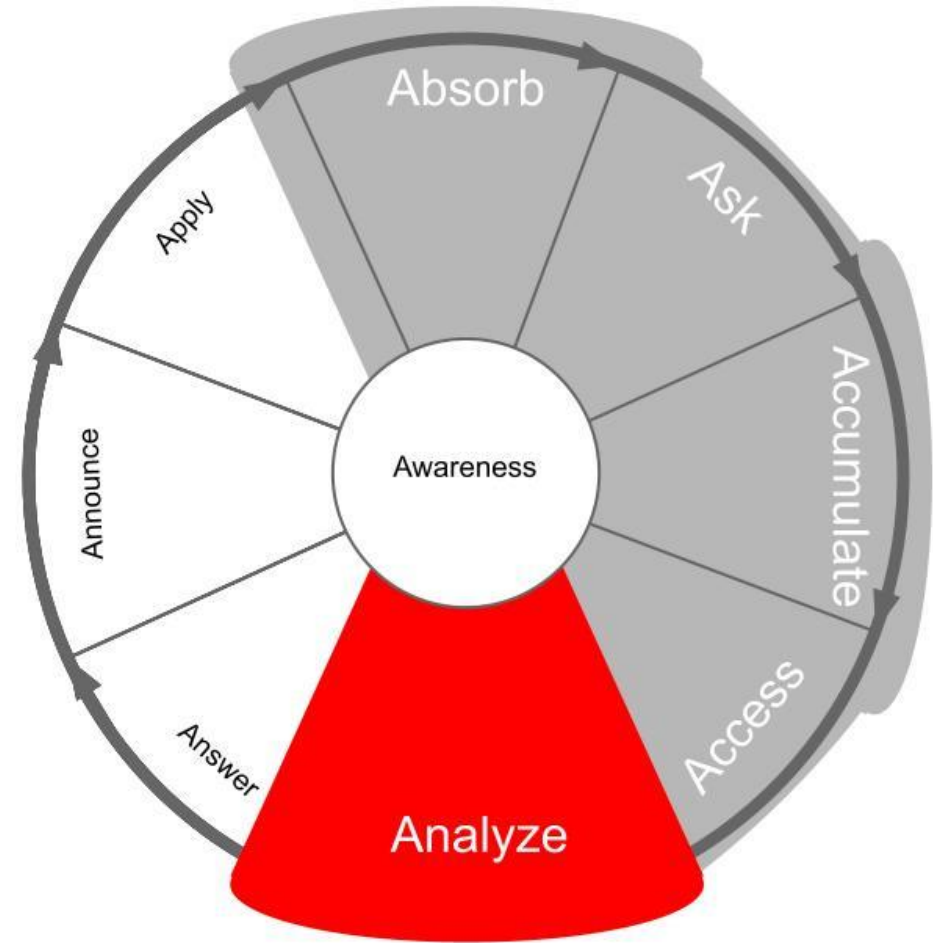

# Analyze

>  $\frac{\text{\# students 3 or higher}}{\text{\# students assessed}} = \% \text{ success}$

>  $\% \text{ success} - \% \text{ target} = \% \text{ point difference}$

# Answer

- > Describe the extent to which the actual % is above or below the target %
- > Describe limitations and implications

# Announce

Distribute results to:

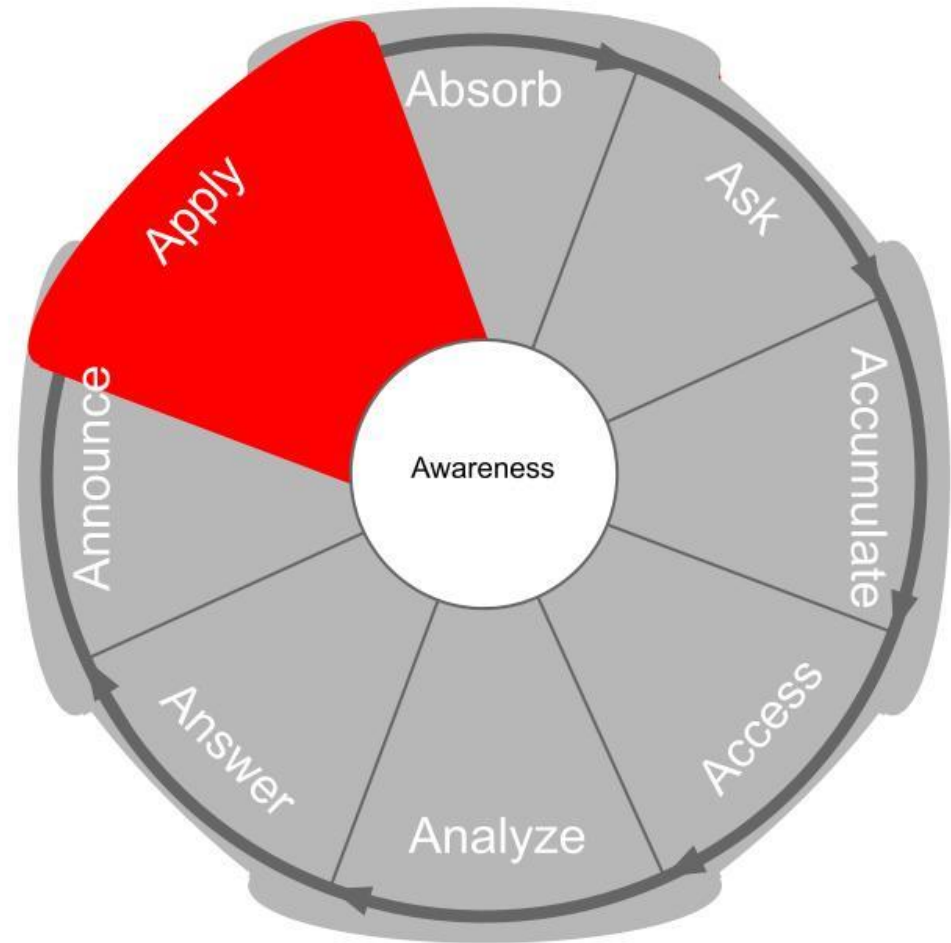

- Program faculty via email and report at a meeting
- Broader campus via yearly program assessment (YPA) report
- External program reviewers via a self-study report

# Apply

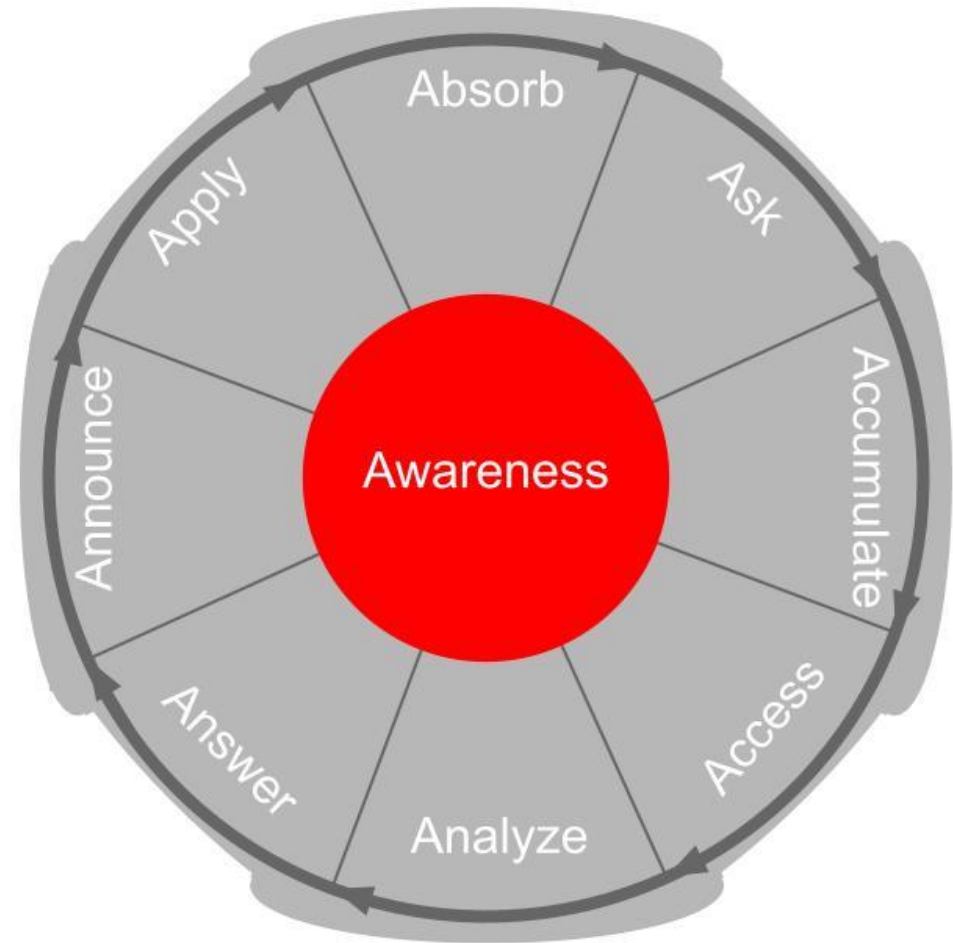

Use results to make decisions relevant to program:

- > Content
- > Delivery
- > Assessment

# Awareness

> All stages of the outcomes assessment process were addressed and collectively served a common purpose

Intersection: A Journal at the Intersection of Assessment and Learning  
*Early View*

---

**Abstract:** This paper begins by establishing the A+ Inquiry model as a theoretical lens for assessing needs related to program assessment workload by demonstrating its alignment with elements of five published frameworks associated with higher education assessment. Then, it uses the model as a frame of reference to explore faculty needs related to program assessment workload. The study examines faculty perceptions associated with five areas related to program assessment: time commitment, processes, impact, barriers, and recommendations. Quantitative and qualitative data were collected by administering an online survey to all faculty across the institution. Results revealed an average amount of time that faculty spend on program assessment efforts, tasks in assessment processes reflecting the highest and lowest levels of faculty satisfaction, a gap between perceptions of potential and actual impact of program assessment, four themes related to barriers inhibiting program assessment, and four themes related to recommendations for improving program assessment.

**Keywords:** *needs assessment, program assessment, program evaluation*

### Introduction

Program assessment helps academic programs ensure that students are learning what they are
