

Consider an MSIS degree

Minot State University's Master of Science in Information Systems (MSIS) program is designed to develop you into a technologically sophisticated business executive who forecasts technology needs, develops information systems infrastructures, manages existing systems, and communicates interdepartmentally. Our MSIS program provides opportunities for you to assume greater management responsibilities within your organization or to be an independent consultant who works through virtual business arrangements.

Employment outlook

A degree in MIS can be used in all industries and offers opportunities to advance quickly within your career while making a difference.

North Dakota's IT Industry:

- ▶ has an average wage 48% higher than the state average.
- ▶ has doubled the national job growth rate since 2002.
- ▶ will hire 2,600 workers through 2020.
- ▶ is important to all industries.

Flexibility

You can complete this highly accelerated master's degree program in as little as two semesters, giving you a competitive edge. You can also set a more relaxed pace by completing the program over additional semesters.

All courses are offered entirely online, making it possible for you to attend class regardless of where you live, work, or are traveling to.

Quality

- Our MSIS degree is valued by many employers.
- Minot State faculty members are highly qualified in their respective fields.
- The College of Business is accredited by the International Assembly for Collegiate Business Education (IACBE).

Affordability

When you enroll in the MSIS program, you pay our affordable in-state tuition regardless of residency. Research assistantships may be available to you as a graduate student. Contact the program director for complete details. Financial aid is also available to qualifying students.

Career opportunities

The number of available career paths for IS professionals are increasing significantly in all industries from agriculture to banking, energy, and healthcare. Career opportunities include, but are not limited to:

- Consulting
- Data administration
- Systems integration
- Project management
- Software development
- Networking, telecom, and infrastructure
- Managing sourcing and global projects
- Consumer products and services
