

Good Afternoon,

A reminder of this week's COVID testing opportunities (3<sup>rd</sup> Floor MSU Dome):

**Tuesday, September 15: 9:00-11:00 am**

**Friday, September 18: 9:00-11:00 am**

Of particular importance this week, we want to focus on those who may not yet have been tested this fall. It is certainly fine for anyone to get tested (including those who have already been tested once or twice), but **it is especially important for those of you who have not had a test yet this fall to please do so this week.** Our increase in active cases the past few days, especially with asymptomatic carriers, further demonstrates the need for us to remain aggressive with our testing to identify and isolate any positive cases on campus to help prevent further spread of the virus.

As always, please pre-register before going to the Dome – use this link: <https://testreg.nd.gov/> (and if you have already pre-registered, you do not need to do so again).

Thanks for your ongoing assistance and vigilance with MSU's COVID protocol – including our testing regimen,

Steve
