

Minot State faculty, staff, and students:

Minot State University continues to monitor the respiratory illness outbreak caused by a new coronavirus named COVID-19. In order to centralize information, the University has created a website within the [MinotStateU.edu](https://www.minotstateu.edu) platform with information including Travel Guidance, Frequently Asked Questions, a Minot State update archive, and COVID-19 updates. The University will continue to send information directly to faculty, staff, and students via email, update daily campus announcements, and the weekly student announcement as information changes, and will strive to keep the new website as up-to-date as possible. The link to the site is below:

<https://www.minotstateu.edu/health/covid-19/>
