

Secure File Transfer System

User Guide

Secure File Transfer System via Email

NDUS faculty, staff, and students have a new method for sending and receiving files containing sensitive information or for sending and receiving files that exceed Outlooks file size limitation. LiquidFiles is a secure file transfer system for person-to-person email communication. LiquidFiles can be accessed in two ways: online or through an installed Outlook plugin. Files can be shared securely with users inside or outside the NDUS system. LiquidFiles works fast, just as you would expect with standard email.

Accessing LiquidFiles Online

- 1. Navigate to this URL: <u>https://sendfiles.ndus.edu</u>
- 2. Use your IdM (identity management system) user ID and password to log in. Once logged in, your account will be created and you are ready to start using the application.

Sending Files Using the Standard Compose Window from the Web

- 1. **Select recipients** type the recipients email address. LiquidFiles is not tied to any directory information however your browser may remember previous email addresses. Address fields include: To, Cc, and Bcc.
- 2. Type the **Subject** and **Message** to your recipients.
- 3. Add Files, you can add files up to the max size displayed for your Group.
- 4. **Message expires after:** by default, the maximum number of downloads per recipient is 2. There is no need to indicate a value in this field.
- 5. **Private Message** a Private Message is a message where the Message is not included in the email sent to the recipients. When sending a Private Message:
 - The recipients will get a generic email telling them to click on the link to view the message.
 - You will get a read receipt when the recipient has viewed the message as well as when any attachments has been downloaded.
 - You can send a Private Message without any attachments.

- It's not possible to send a Private Message with the permission that Anyone can download

 in order to send a Private Message, authentication is required.
- 6. **Limitations** displays the maximum file size allowed in LiquidFiles. Clicking Blocked Extensions produces a list of file extensions that cannot be transmitted through LiquidFiles.
- 7. When you're ready, click **Send**. As a sender, you will receive a receipt when your recipients accessed the secure attachments/private messages.

How Recipients Retrieve Files

NDUS Recipients

Will log in using their IdM credentials (username and password) to access the link.

External Recipients

Since external users do not have IdM credentials, they log in with their email address as their ID. This initiates a validation code which is sent to their email account and makes the link accessible.

Liquid Fi	es Secure Messages +	BEST PRACTICE
	Message	Let external recipients know what they can expect in th message you send them.

	Hi Homer, When you click the link to the report, pl address for the username. This will initi code needed to open the link. That code email address.	ate the validation

Requesting Files Using LiquidFiles Online

LiquidFiles' **Request File** option provides an easy way for you to request files from someone. There's no prior registration required and no need to walk someone through the process over the phone.

To send a file request, make sure you have navigated to https://sendfiles.ndus.edu

- 1. Click the **gear icon** located in the upper right corner of the page of the compose page.
- 2. Choose Request File.

То	burns@springfield.com			
Subject	Re: Please send the Report we	e discussed		NOTE
Message	Message		one-ti will ex	Ie Request link is me use only and pire once the files been delivered.
	+ Add Files Send	Limitations Max size: 18 GB		

- 1. The recipient types their comments in the Message area,
- 2. clicks the green Add Files button to attach the file,
- 3. and when finished, clicks the blue **Send** button.

Accessing LiquidFiles Using the Outlook Plugin

Download the LiquidFiles Outlook plugin here: <u>https://man.liquidfiles.com/clients/</u>. Once the plugin is installed and enabled in Outlook, an additional **Secure Attach** tool appears at the end of the ribbon when creating a new message or replying.

The Secure Attach drop-down menu provides these options:

- 1. Secure Attach any file you would normally attach using the attach icon on Outlook can be attached using this Secure Attach button instead. This will cause any file attached to the email to be sent using LiquidFiles.
- 2. Attach Folder you can also attach a folder at once and all files in this folder will be attached to this email.
- 3. Secure Attach All this setting can automate that every Outlook attachment be sent through LiquidFiles. This is not recommended.
- 4. **File Request** provides an easy way for you to request files from someone.
- 5. **Private Message** a Private Message is a message where the Message is not included in the email sent to the recipients. See previous information.
- 6. Select Existing Files any file you've already sent that hasn't expired is available to send again without having to upload the file again.
- 7. **Options** settings for the plugin within Outlook. See section entitled "LiquidFiles Outlook Plugin Account Options" for more detailed information.

Outlook Settings and Configuration

The first time you attach a file to LiquidFiles, you will see this login window:

۵	Configure NDUS File Sharing Account Details	
Server	URL to the server	
User name	IdM Usemame	
	The user name to use when sending files	
Password	•••••	
The password to use with NDUS File Sharing		
	ОК	
	Version: 2.0.67.0	

Verify or input the following information:

- Server: <u>https://sendfiles.ndus.edu</u>
- User name: input your IdM username (firstname.lastname)
- Password: input your IdM Password

Please note that you only have to fill this in once. The LiquidFiles Outlook plugin will keep you logged in even if you change your network password.

LiquidFiles Outlook Plugin Account Options

This section is for your information only. There is no need to change these settings.

- Logged in as: displays the currently logged in user.
- **Logout** clicking this link will require you to reconfigure the connection.
- Online Help click this link to access Liquid Files online help

long you want to see the window visible after you've sent the files.

• Keep file visible after they have been sent, ms: (ms refers to milliseconds)

Outlook Plugin Options

• Add message to email: you can place the LiquidFiles Attachment information after your signature, placed below the body your email or at the top of it (please see the recipient email to see how the attachment information looks).

Upload Message Body

- Send the message using HTML, as plain text, or do not send any message through LiquidFiles.
- Automatic Send via Secure File Transfer for attachments of MB: As a default, Outlook's limitation for attachments is 10 MB. This setting specifies that files exceeding the threshold indicated will automatically be send via LiquidFiles.

Who to Contact for Support

Contact the MSU IT Help Desk using any of these methods:

- Navigate your browser to: <u>https://www.minotstateu.edu/itcentral</u>
- Call: 1-701-858-4444
- Email: <u>helpdesk@minotstateu.edu</u>
