- Cohort Analysis
  - The concept of this report is to track cohort student enrollment through graduation
  - Data Metrics found that although we have Hobson's this only tracks Inquiry to 1<sup>st</sup> year enrollment
  - Data Metrics investigated software that would track a student's enrollment and found that Hobson's Retain would be the best option, however the cost was upwards of \$30,000 and it was mentioned that NDUS may be implementing this as a result of the Governor's plan on course completions sometime in the near future.
  - o Data Metrics decided to create this database manually
  - o Summer 2013 the following cohorts were ran and compiled
    - **2008**
    - **2009**
    - **2010**
    - **2011**
    - **2012**
  - Additional Variables were brought in:
    - Credits attempted
    - Credits completed
    - Retention
    - Graduation
    - Student Tracker- National Student Clearing House Information (ran summer 2013)
  - o Data Metrics created a Student Status Column based on Student Tracker

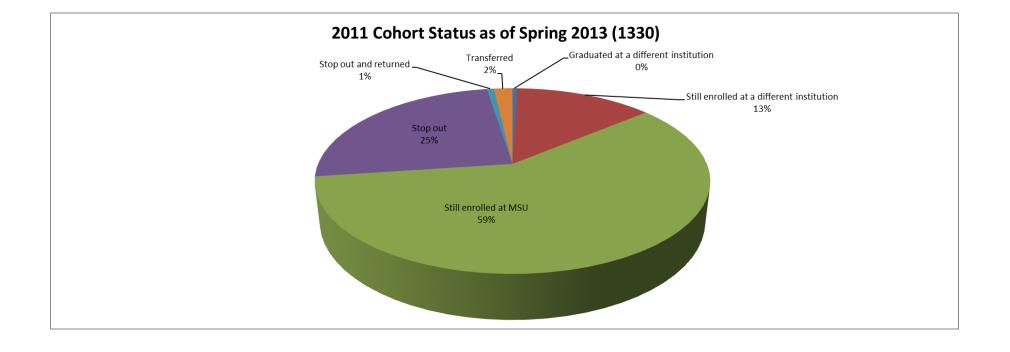

- Graduated at a different institution
- Graduated at MSU
- Still enrolled at a different institution
- Still enrolled at MSU
- Stopped Out
- Stopped Out and Returned
- Transferred to another institution
- It is the intent of the Data Metrics team to update the Student Cohort each summer once graduation data has been processed and available through Student Tracker
