

proctorFREE

ProctorFree is a completely on-demand, automated proctoring solution. With the use of machine learning, computer algorithms, and facial recognition, ProctorFree provides an accurate authentication and proctoring solution that is scalable, user-friendly, and the most cost-effective option available to colleges and universities. Some key features of ProctorFree include:

- **On-Demand:** There is no pre-scheduling required for our solution. Students can test whenever they are ready with a simple click of a button. ProctorFree is available 24/7/365.
- **Automated:** There is no human intervention with our solution eliminating human error and bias during the proctored session.
- **Reporting:** Comprehensive reports sent to the professor or designated test administrator within minutes of test completion. The report includes a video recording of the student and screen.
- **Anomaly Reports:** In addition to the video recording of the student and screen, a list of anomalies tells you the exact minute and second of when a cheating-like behavior occurred. You can quickly review the behavior and make a decision on whether cheating occurred or not.
- **LMS Integration:** ProctorFree offers seamless integrations with Blackboard, Canvas, Desire2Learn, and Moodle.
- **Cost-Effective:** ProctorFree charges a low rate per exam fee. There are no extra fees for longer exams.
