Introduction

Vision

The North Dakota Council on Abused Women’s Services – in collaboration with the Rural Crime and Justice Center, and the Injury Prevention Division of the North Dakota Department of Health – offers this document as a means to end domestic and sexual violence in North Dakota. This vision is both broad and specific. By piecing together data from discrete sources, perhaps a comprehensive picture of domestic and sexual violence can be gained. The intention is to compile data from numerous sources – such as law enforcement, hospitals, treatment centers, state agencies, federal programs, and victim service providers – and thus to gain broader understanding of the contexts, circumstances, and trends that relate to domestic/sexual violence and, ultimately, violence prevention.

The Centers for Disease Control and Prevention (CDC) suggest that “data can show us how an injury problem changes over time, alert us to troubling trends with that type of injury, and let us know what impact prevention programs are having.”¹

According to the CDC, “The lack of consistent information about the number of women affected by violence limits our ability to respond to the problem in several ways:”

- It “limits our ability to gauge the magnitude of violence against women…”
- It “limits our ability to identify those groups at highest risk who might benefit from focused intervention or increased services.”
- It “limits our ability to monitor changes in the incidence and prevalence of violence against women over time. This, in turn, limits our ability to monitor the effectiveness of violence prevention and intervention activities.”²

As such, this document exists as

- a centralized reference and sourcebook that contains all recent, available data relevant to domestic and sexual violence in North Dakota;
- a baseline and framework, providing a format for similar projects in the future, and for further collaboration on data collection efforts;
- a means to assess areas of growth and need – in terms of violence prevention, response, and data collection;

² Ibid.
• an agent of change that increases the understanding of domestic and sexual violence, thus inspiring policy-making, program evaluation, and the further development of a coordinated response.

Overview

The report is divided into two complementary sections. Both sections include information about participating agencies and about the database each agency maintains. The two sections differ only in their approach to the data. Section One offers “data analysis.” The authors present a descriptive analysis based on raw data, allowing comparison between and among variables – such as offender characteristics, injury to victims, arrest, and provision of services. Section Two, however, offers “results.” All data analysis has already been conducted by each respective agency; the authors of this report provide no further analysis.

Background and Purpose

In 2001, a multi-disciplinary committee began to draft the “North Dakota State Plan.” This project arose through a partnership between the North Dakota Council on Abused Women’s Services and the North Dakota Department of Health. Funding was provided by a “Violence Against Women” planning grant from the Centers for Disease Control and Prevention.

Over the course of a year and a half, the multi-disciplinary committee completed a draft of the “State Plan.” The purpose was to effect an integrated, coordinated continuum of response to domestic violence and sexual assault – with the vision of creating a safe state. Through the planning process, priorities were identified as part of the State Plan:

Priority 1: Strengthen and promote awareness of services and advocacy among professionals.

Priority 2: Increase collaboration among service providers.

Priority 3: Increase awareness of domestic violence and sexual assault issues among adults through education, prevention, and training.

Priority 4: Increase the awareness of domestic violence and sexual assault issues among children through education, prevention, and training.

Priority 5: Create, publish, and disseminate a yearly profile of domestic violence by establishing a statewide, multidisciplinary, comprehensive data collection infrastructure.

Priority 6: Research and develop alternative approaches to funding and resources to address violence against women.
Goals, strategies, and action steps were identified within each priority. The purpose was to develop, sustain, and implement  **intervention, prevention, and public policy strategies** in North Dakota. Overall, the intention was to ensure that community and statewide responses to violence against women were coordinated and thus effective.

For over 20 years, North Dakota, like other states, has made various attempts to document, verify, and analyze patterns of domestic and sexual violence. These attempts were usually initiated by victim service providers and then by law enforcement agencies. Over the years, other partners, such as health care and mental health providers, have also begun to screen and count patients presenting with “intentional injuries.” Within recent years, the courts and prosecutors have begun to create databases to track cases within their systems. As a result, North Dakota now has access to a  **variety of data sets** – which are at various stages of development, designed for a variety of purposes, and contain their own biases and assumptions.

Because of this variety in data collection, the ND Council on Abused Women’s Services and the ND Department of Health have now collaborated with the Rural Crime and Justice Center at Minot State University. This collaboration has resulted in the  **collection and analysis of existing data sets**, in order to better understand the phenomena of domestic and sexual violence in North Dakota. The intention is that this report will enable systems, agencies, and organizations to develop an increasingly cohesive response to domestic violence, and thus meet the objectives of the “State Plan.”

**Limitations**

This document cannot offer a complete profile of domestic or sexual violence in North Dakota. Each participating agency collects data in its own fashion to meet its own goals and obligations. Therefore, because data is not collected in a standardized manner across agencies,  **data cannot be presented – or analyzed and compared – in a uniform format**. Inevitably, gaps exist in the data that is presented here. These gaps in available data represent the major limitations of this document. However, this document exists not only to present the data that is available, but also to identify areas where further, more coordinated data collection may be beneficial. The limitations signal a need for  **further research** and collaboration.
Section One

Section One offers **agency and database descriptions** for each participating entity. In addition, this section includes original **data analysis** based on raw data.

In some cases, “results” are also presented; this term refers to the **results** of data analysis which had previously been conducted by the participating agencies.

**Section One** contains the following segments:

- **North Dakota Council on Abused Women’s Services**
- **Batterers’ Treatment**
- **North Dakota Supreme Court**
The table above represents the 19 programs that participated in the data collection project for 2002.
Agency Description

Formed in 1978, the North Dakota Council on Abused Women’s Services (NDCAWS) exists for the purpose of

- pursuing and exposing the causes of domestic and sexual violence,
- assuring direct and immediate services to those who are victimized, and
- supporting those who provide such services.

NDCAWS consists of a centralized coalition office, as well as 19 member programs in North Dakota. Each member program serves a particular region in North Dakota. (Please see Appendix.) Specifically, each program provides

- emergency shelter,
- advocacy,
- direct services, and
- community education.

Based on location and availability of resources, programs might provide the following additional services:

- counseling,
- transitional shelter,
- batterers’ treatment, and
- family visitation centers.3

Database Description

The 19 participating victim service programs collect and compile victim demographic and service data through use of a comprehensive Microsoft Access XP database application. This database application was developed by the Uniform Data Collection Project whose members include NDCAWS, the Coalition Against Sexual Assault in North Dakota (CASAND), the 19 participating programs, as well as federal and state grant administrators for victim services in North Dakota.

Data is collected primarily through self-reports by victims who seek services. Additional data is also obtained via collateral information that agencies accumulate as a result of advocacy within the criminal justice system. Data collected includes the following:

- victim demographics;
- type of victimization;
- relationship between the victim and offender;

---

3 Agency description was obtained from information found in the North Dakota State Plan, entitled “Our Future Depends Upon How We Live Today: Building Lives Free From Violence in North Dakota.”
• drug or alcohol use associated with violence;
• weapon use;
• history and frequency of violence in the relationship;
• past history of abuse;
• services provided;
• secondary victim demographics and services;
• demographics of and services for child witnesses of abuse;
• economic, TANF, and health insurance data;
• offender demographics;
• visitation information for relevant programs;
• shelter information including number of residents and number of days sheltered;
• emergency protection orders granted, denied, or violated;
• law enforcement and judicial system response; and
• training sessions and public presentations provided by the 19 participating programs.

The Microsoft Access XP software application generates a local, agency-based report. This report is then forwarded to NDCAWS and CASAND for annual and semi-annual compilation. This compilation results in the development and publication of a statewide fact sheet.

Data Analysis

The following analysis pertains to all new or “unduplicated” domestic violence victims who were served by each of the 19 participating programs in calendar year 2002. Each table presents percentages, rather than raw numbers, for the variables indicated in the table headings.

To obtain these percentages, raw variable numbers for each program were divided by the number of new or “unduplicated” victims served by that program. For example, if an agency served a total of 200 victims, and 100 of those were between the ages of 30 and 44, the table would show that 50% of victims of domestic violence served by that agency in 2002 were in that age range.

In terms of this data, each agency was treated as its own entity. Percentages reflect numbers within the agency; they do not reflect comparisons between local and statewide statistics. Comparisons between agencies were not made for this project because of the significant differences in service-area populations for the 19 participating programs across North Dakota.

As a reference for agency abbreviations, please review the “Agency” information at the beginning of the NDCAWS section.

Results

Each year, NDCAWS publishes a fact sheet entitled “Facts about Domestic Violence in North Dakota.”

The following statewide results from 2002 may be of interest:

- **4,197 victims of domestic violence** received services from crisis intervention centers.
  - 94% were women.
  - At least 43% were under the age of 30.
  - At least 13% were disabled.

- **5,758 incidents of domestic violence** were reported to crisis intervention centers.
  - At least 4,422 children were directly impacted by these incidents.

- Alcohol was used in some incidents of domestic violence.
  - Alcohol use by the abuser was known in 32% of cases served.
  - Alcohol was used by both the victim and the abuser in 10% of cases.

- In at least 15% of cases, weapons were used.
  - Of these, 25% involved guns, and 27% involved knives.

- In at least 35% of cases, the abuser had a history of abusive behavior with other adults.

- Law enforcement officers were called to respond in 50% of cases.
  - In at least 35% of these cases an arrest was made.

- **886 emergency orders for protection** were filed with assistance from domestic violence program staff.
Victims reported that 127 batterers violated protection orders in calendar year 2002.

- 78 were arrested for an initial violation.
- 29 were arrested for a subsequent violation.\(^4\)

\(^4\) Information contained in the database description and tables was provided by the coordinator of the Uniform Data Collection Project, using the Project’s Microsoft Access XP Database Application and “Facts About Domestic Violence in North Dakota for the Year 2002.”
Batterers’ Treatment

Introduction

The North Dakota Adult Batterers’ Treatment Forum is sponsored by the North Dakota Council on Abused Women’s Services (NDCAWS). The Forum includes representatives from a variety of human service, criminal justice, and social service fields.

The initial purpose of the Forum has been to

- develop standards for the treatment of batterers in North Dakota and
- create a network that promotes the safety of victims and assists batterers in stopping abusive behavior.

As developed by the Forum, the Batterer Treatment Standards offer the following position regarding domestic violence:

Domestic violence

- is a crime involving power and control, which
- requires swift and sure consequences for batterers in order to protect victims.

The Standards also suggest that abusive behavior can be deterred through cooperation and intervention by police, courts, probation services, victim advocates, offender-specific treatment programs, schools, and child protection services.5

Information is currently available regarding four programs that offer batterers’ treatment:

- Lutheran Social Services, Bismarck;
- Badlands Human Service Center, Dickinson;
- Northwest Human Service Center, Williston; and
- Community Violence Intervention Center, Grand Forks.

Each of these four treatment programs is based on the Duluth Model.

Other batterers’ treatment services are available throughout North Dakota; these programs are at various stages of compliance with the voluntary standards. Please contact NDCAWS at 888-255-6240, www.ndcaws.org, or ndcaws@ndcaws.org for more information about these programs or about the Duluth Model.

---

5 Information about the Batterers’ Treatment Forum was found in the brochure entitled “Batterers’ Treatment Standards: A Summary for Judges and Service Providers from the North Dakota Batterers’ Treatment Forum.”
Database Description

Of the four batterers’ treatment programs listed above, three provided data for this publication. There is no standardized intake form among the programs, however, and there is variability in how and what data is collected. Therefore, for the purpose of this publication, only basic demographic information on batterers is presented. The tables reflect the characteristics of batterers who participated in each program. At this point, the tables should not be used to draw conclusions – either about all batterers in North Dakota or about the three programs that voluntarily submitted data for this publication.

Each of the three programs collects the following data from its participants:

- demographic information about participants;
- demographic information about the current and former partners of participants;
- length of each relationship;
- prior involvement (if any) in the criminal justice system;
- history of arrest (if any);
- whether their partner has ever called 911 because of their behavior;
- length of parole or probation (if applicable); and
- referral source (including court order).

Each program also collects data regarding the participants’

- understanding of their actions,
- abusive behaviors toward their partners,
- history of drug and alcohol use,
- past experiences with counseling;
- childhood experiences with abuse and domestic violence, and
- children (including whether these children have witnessed domestic violence).6

6 Database description was obtained through personal communication with representatives of the North Dakota Adult Batterers’ Treatment Forum.
Lutheran Social Services
Freedom from Violence Program

Agency

Freedom from Violence Program
Lutheran Social Services
1616 Capitol Way
Bismarck, ND 58501
www.lssnd.org

Agency Description

Lutheran Social Services of North Dakota is a statewide, non-profit agency that provides social services, including

- **Family-Based** Services,
- **Youth** Services, and
- the Freedom from Violence program.

The purpose of **Family Based Services** is to provide

- an alternative to out-of-home placement of children and adolescents and
- high-quality professional services that strengthen families and promote their future self-sufficiency.

The purpose of **Youth Services** is to

- meet the needs of young people facing a variety of situations and
- assist their families.

Services include attendant care, youth court, tracking, restorative justice, independent living, child care resource, and Luther Hall (a licensed residential treatment center for youth ages 10 to 18).

The purpose of the **Freedom from Violence** program is to

- provide a 36-week treatment program for offenders;
- offer support to those who have been affected by violence;
- support families to understand that violence is a choice; and
- help batterers to realize the impact of their violent behavior on themselves, their partners, and their children.7

---

7 Agency description was obtained from information found on the Lutheran Social Services of North Dakota website at http://www.lssnd.org/programs.html.
Data Analysis

From July 2002 through August 2003, the Freedom from Violence program completed 37 evaluations of domestic violence perpetrators.\(^8\)

Agency  

Domestic Violence Offender Treatment Program  
Community Violence Intervention Center  
211 South Fourth Street  
Grand Forks, ND 58201  
www.cviconline.org/  

Agency Description  

The Community Violence Intervention Center (CVIC) is a private, nonprofit organization that exists for the purpose of enhancing the lives of families, children, and adults. Serving Grand Forks and Nelson counties, CVIC offers five programs that address violence:  

- support and empowerment program for victims of violence,  
- treatment program for batterers,  
- counseling for children who have learned violence at home,  
- community education/training, and  
- collaborative work with other individuals and organizations to improve the community’s response to violence.\(^{11}\)  

Offered through the Community Violence Intervention Center, the Domestic Violence Offender Treatment Program is a 29-week program. It consists of an intake interview, 27 group sessions, and an exit interview. Its purpose is to end domestic violence by following the Batterers’ Treatment Standards, as established by the North Dakota Adult Batterers’ Treatment Forum.  

Data Analysis  

From January 2003 through June 2003, CVIC completed 90 evaluations of domestic violence perpetrators enrolled in the treatment program.\(^{12}\)

North Dakota Supreme Court

Agency

North Dakota Supreme Court
Judicial Wing, First Floor
600 East Boulevard Avenue
Bismarck, ND  58505-0530
www.court.state.nd.us/

Agency Description

The purpose of the North Dakota judicial system is to provide an equal and fair system of justice to citizens of North Dakota.

The system consists of the

- Supreme Court,
- Court of Appeals,
- District Courts, and
- Municipal Courts.

The highest court in North Dakota, the Supreme Court is composed of five justices who are elected through nonpartisan elections to serve ten-year terms. Each justice must be a licensed attorney and a citizen of both the United States and North Dakota.13

Database Description

The North Dakota Supreme Court collects and maintains information from court records and proceedings in North Dakota’s seven district courts. The database contains information regarding

- the county where the offense occurred;
- the case type and number;
- number of counts charged;
- the alleged crime committed by the defendant;
- the criminal code offense number and class;
- the charges that the defendant is facing; and
- the plea, if any, entered by the defendant.

13 Agency description was obtained from information found on the North Dakota Supreme Court website at http://www.court.state.nd.us/COURT/Brochure.HTM.
North Dakota has no distinct and separate crime of domestic violence, and a wide array of statutes could potentially be applied in domestic violence situations. As a result, the Court has identified over 3,000 cases as possible domestic violence crimes.

The particular role of domestic violence, however, cannot be determined in these cases. For example, it is impossible to separate the simple assaults that involved a family or household member from those that did not. The same would be true of terrorizing, aggravated assault, disorderly conduct, and other crimes.

Violation of a protection order is the only crime that can be specifically linked to domestic violence. Protection orders are rarely granted to anyone other than a family or household member, even though such a case is legally possible.

Therefore, this document does not include an analysis of data regarding simple assault or other crimes that may be linked to domestic violence. This document includes only an analysis of data regarding protection order violations.

The North Dakota Supreme Court submitted data for this document for the years 2002 and 2003. This data includes the number of domestic violence protection order violations that were processed through North Dakota’s district courts.

Under the 2003 ND Century Code 14-07.1-01-18, the following definitions are provided of domestic violence, domestic violence protection orders, and domestic violence protection order violations:

"Domestic violence" includes physical harm, bodily injury, sexual activity compelled by physical force, assault, or the infliction of fear of imminent physical harm, bodily injury, sexual activity compelled by physical force, or assault, not committed in self-defense, on the complaining family or household members.

"Family or household member" means a spouse, family member, former spouse, parent, child, persons related by blood or marriage, persons who are in a dating relationship, persons who are presently residing together or who have resided together in the past, persons who have a child in common regardless of whether they are or have been married or have lived together at any time, and, for the purpose of the issuance of a domestic violence protection order, any other person with a sufficient relationship to the abusing person as determined by the court under section 14-07.1-02.

1. An action for a protection order commenced by a verified application alleging the existence of domestic violence may be brought in district court by any family or household member or by any other person if the court determines that the relationship between that person and the alleged abusing person is sufficient to warrant the issuance of a domestic violence protection order. An action may be
brought under this section, regardless of whether a petition for legal separation, annulment, or divorce has been filed.

14-07.1-06. Penalty for violation of a protection order.

Whenever a protection order is granted under section 14-07.1-02 or 14-07.1-03 and the respondent or individual to be restrained has been served a copy of the order, the first violation of any order is a **class A misdemeanor** and also constitutes contempt of court. A second or subsequent violation of any protection order is a **class C felony**. For purposes of this section, "first violation" means the first time any order is violated and a second or subsequent violation of any protection order includes two or more violations of protection orders.

Data Analysis

Of the 53 counties in North Dakota, **27 counties reported and processed protection order violations in 2002 and 2003**. As such, the total number of protection order violations was **365** statewide.

**Tables 1 and 2** present data analysis regarding protection order violations.
Table 1

The following is a breakdown of the protection order (P.O.) violations by county.

Table 2

The following table outlines the **charges that were filed and processed** for the protection order (P.O.) violations listed above. The abbreviation “#” indicates the **number of cases in that category** – such as Class C Felony, Class A Misdemeanor, or Class B Misdemeanor. The abbreviation “%” indicates a **comparison between the county and the state**. For example, of all the P.O. violations that were filed as a Class C Felony (a total of 82 in North Dakota), 37% were filed in Grand Forks County.

Section Two

Section Two presents agency descriptions, database descriptions, and results obtained from agency databases. This section covers a range of fields from victim services to federal grant programs.

Specifically, Section Two contains the following segments:

- **Victim Services**
  - Coalition Against Sexual Assault in North Dakota
  - North Dakota Victim Assistance Association

- **College Students**
  - Sexual Assault, Violence, and Stalking among North Dakota College Students

- **Children and Youth**
  - Children’s Advocacy Center
  - Child Abuse Clinic
  - North Dakota Kids Count!
  - Youth Risk Behavior Surveillance System

- **Criminal Justice**
  - North Dakota Department of Corrections and Rehabilitation
  - Bureau of Criminal Investigation
  - Crime Laboratory Division of the Office of the Attorney General

- **North Dakota Department of Health and North Dakota Department of Human Services**
  - Behavior Risk Factors Surveillance System
  - Pregnancy Risk Assessment Monitoring System
  - Division of Emergency Health Services
  - Division of Children and Family Services
  - Division of Mental Health and Substance Abuse

Victim Services

Introduction

The following segment, “Victim Services,” contains information obtained from two statewide coalitions that serve victims of domestic or sexual violence:

- Coalition Against Sexual Assault in North Dakota
- North Dakota Victim Assistance Association
Coalition Against Sexual Assault in North Dakota

Agency

Coalition Against Sexual Assault in North Dakota
418 East Rosser Avenue, Suite 320
Bismarck, ND 58501
www.ndcaws.org

Agency Description

The Coalition Against Sexual Assault in North Dakota (CASAND) is a statewide, non-profit network of rape crisis centers that serve victims of sexual assault. The purpose of CASAND is to

- promote understanding and sensitivity to the problems and rights of victims;
- conduct community and professional education through the media, literature, workshops, and other programming;
- coordinate a statewide support and referral service for sexual assault survivors and their families;
- affect public policy as it relates to the needs of sexual assault survivors;
- tabulate and disseminate statistical data from service providers; and
- work toward a coordinated, sensitive effort among law enforcement, medical providers, the judicial system, and community members who are in contact with survivors of sexual assault.

CASAND consists of a centralized coalition office, as well as nineteen rape crisis centers in North Dakota. Each member program provides

- emergency shelter,
- advocacy,
- direct services, and
- community education.

Based on location and availability of resources, programs might also provide counseling or support groups.

Database Description

The nineteen victim service programs participate in data collection through a Uniform Data Collection Instrument. Using this instrument, programs gather information from victims who seek services.

---

14 Agency description was obtained from information found in the brochure entitled “Coalition Against Sexual Assault in North Dakota.”
This information includes

- **victim** demographics,
- **type** of victimization,
- **relationship** between the victim and offender,
- **drug or alcohol** use associated with violence,
- **weapon** use,
- presence of any **previous** violence by the offender toward the victim,
- past **history** of abuse,
- presence of a court order or **protection order**, 
- **law enforcement** and judicial system response,
- any need for **public assistance,** 
- demographics of any **children** involved, and
- demographics of any **secondary victims**.

These programs then submit their local data to the CASAND coalition office, where **statewide analysis** takes place.

**Results**

During **2003**, CASAND programs served **797 primary victims of sexual assault**, as well as **321 secondary victims**.

- At least **52%** (418) of primary victims were **under the age of 18** at the time of the assault(s).

- At least **89%** (709) of the **victims** were **female**.

- At least **91%** (729) of the **assailants** were **male**.

- At least **3%** of the **assailants** were **female**.

- At least **82%** (657) of the cases were **male assailant/female victim**.

- At least **9%** (72) of the cases were **male assailant/male victim**.

**Most** cases of **adult** sexual assault involved **rape**.

- At least **65%** of the adult assaults involved **rape**.

- **14%** involved **attempted rape**.

- **21%** involved **sexual contact** other than rape or attempted rape.
In most cases, sexual assault occurred in the home. In most cases, assailants were known to the victim.

- At least 62% of the assaults occurred in the victim’s or assailant’s home.
- At least 32% of cases involved incest or indicated a history of incest.
- In at least 40% of cases, the assailant was a friend, acquaintance, or date of the victim.
- In adult cases, 10% of the assailants were strangers.
- In child cases, 4% of the assailants were strangers.

Many referrals came from people who were familiar to the victim.

- At least 45% of the victims were referred to sexual assault services by themselves, friends, or family members.

Most adult victims contacted sexual assault services within 30 days of the assault.

- At least 32% of adult victims contacted a sexual assault center within two days of the assault.
- Approximately 30% of adult victims contacted a sexual assault center within three to 30 days of the assault.

Victims reported 63% of the crimes to law enforcement.

CASAND served more victims of sexual assault in 2003 than in 2002.

- In 2003, CASAND programs served 3% more primary victims than in 2002.
- In 2003, CASAND programs served 14% more primary and secondary victims than in 2002.\footnote{Results were obtained from information found in a fact sheet entitled “Facts About Sexual Assault in North Dakota for the Year 2003,” published by the Coalition Against Sexual Assault in North Dakota.}

Domestic and Sexual Violence in North Dakota 40
Agency Description

The North Dakota Victim Assistance Association (NDVAA) is an association of and for professionals in the criminal justice system who provide direct services to crime victims and witnesses. Offices are located in 20 locations around the state.

The purpose of NDVAA is to

- **improve** the treatment of victims and witnesses of crime,
- provide victims and witnesses with assistance and services necessary to speed their recovery, and
- **support** and aid them as they move through the criminal justice process.

Services include:

- general information about the criminal justice system,
- employer intercession,
- protection information,
- expedited return of property,
- referrals to public and private assistance agencies,
- orientation to the courtroom,
- court appearances and notification services (including cancellation of appearances), and
- victim compensation information.16

Data regarding domestic violence, sexual violence, or child abuse was not provided or was otherwise unavailable at the time of publication.

---

16 Agency description was found in the North Dakota Crime Victim and Witness Assistance brochure.
College Students

Introduction

This segment features results of a statewide survey conducted by North Dakotans Working in Education Against Violence. The survey is entitled “Sexual Assault, Violence, and Stalking among North Dakota College Students.”
Sexual Assault, Violence, and Stalking among North Dakota College Students

Agency

North Dakotans Working in Education Against Violence (NDWEAV)
North Dakota Council on Abused Women’s Services
418 East Rosser Avenue, Suite 320
Bismarck, ND 58501
www.ndcaws.org

Agency Description

The purpose of NDWEAV is to

- reduce the incidence of violence against women; and
- provide education and advocacy services regarding domestic violence, sexual assault, and stalking – to all individuals in the campus community.

NDWEAV is a collaborative project sponsored by the North Dakota Council on Abused Women’s Services (NDCAWS). Six campuses participate in NDWEAV, as do the domestic violence/sexual assault service providers from the surrounding communities. The participating campuses and community service providers include

- Jamestown College
- S.A.F.E. Shelter, Jamestown
- ND State College of Science, Wahpeton
- Three Rivers Crisis Center, Wahpeton
- Mayville State University
- Rape and Abuse Crisis Center, Fargo
- University of North Dakota, Grand Forks
- Community Violence Intervention Center, Grand Forks
- Lake Region State College, Devils Lake
- Safe Alternatives for Abused Families, Devils Lake
- Fort Berthold Community College
- Fort Berthold Coalition Against Domestic Violence

Database Description

In 2003, NDCAWS commissioned Sheila Steiner, Ph.D., to administer a personal violence survey to North Dakota’s college students. Dr. Steiner, faculty member at Jamestown College, conducted the study in partial replication of the survey conducted in North Dakota in 1994.
The goals of the 2003 survey were to

- obtain an estimate of the prevalence of personal violence experienced by college students in North Dakota – with a particular emphasis on sexual assault, relationship violence (dating violence and domestic violence), and stalking;
- gather detailed information about how students respond to these forms of violence;
- measure student attitudes and knowledge regarding sexual assault, relationship violence, and stalking;
- measure student attitudes and knowledge regarding safety on and off campus, as well as relevant services;
- draw comparisons between responses to the 1994 survey and the 2003 survey.¹⁷

Eleven colleges and universities in North Dakota participated in the 2003 survey:

- North Dakota State University, Fargo
- University of North Dakota, Grand Forks
- Mayville State University
- Valley City State University
- Bismarck State College
- Lake Region State College, Devils Lake
- Minot State University-Bottineau
- North Dakota State College of Science, Wahpeton
- Fort Berthold Community College
- Jamestown College
- University of Mary, Bismarck

During the spring of 2003, each institution provided a random sample of 10% of its full-time undergraduate students. Of the 2,574 surveys sent to students, 326 were returned – making “an overall response rate of 12.7%, considerably lower than the 32% response rate on the 1994 survey.”¹⁸ Dr. Steiner cautions that the “low return rate limits interpretations of data.”¹⁹ NDWEAV considers the 2003 survey to be one in a series, however, with more conclusive data to follow.²⁰

¹⁸ Ibid.
¹⁹ Steiner, S., & Kraft, K. (2004). Experiences of and attitudes about sexual assault, violence, and stalking among North Dakota college students. Presentation given at the Campus Violence Summit, Wahpeton, ND.
²⁰ Source for this information was Renee Stromme, NDWEAV Director.
Results

Respondents to the 2003 survey had the following general demographics:

- 72% female, 27% male, 1% unknown.
- 94.8% Caucasian.
- Even distribution of class standing.
- 53.1% lived off-campus.
- 82.5% were single.
- Even distribution from small and large towns.21

Respondents were asked to indicate whether they had experienced any of several types of incidents involving

- unwanted sexual activity,
- non-sexual assault,
- stalking, and/or
- sexual harassment.

The following data may be of particular interest:

- Of the 326 respondents, 53.7% (175) noted at least one “incident” at some point in their lives.
  - An “incident” is defined as unwanted sexual activity, non-sexual assault, stalking, or sexual harassment.
  - This number includes 138 females, 36 males, and one of unknown gender.
- Females noted more of all types of “incidents” (except non-domestic assault) than males.
- 33% (107) of respondents experienced at least one “incident” while attending their current college or university.
- More than half of respondents (53.3% of females and 52.9% of males) said that the most serious “incident” happened before college.

---

21 Steiner, S., & Kraft, K. (2004). Experiences of and attitudes about sexual assault, violence, and stalking among North Dakota college students. Presentation given at the Campus Violence Summit, Wahpeton, ND.
• 41% of females and 22% of males had experienced some type of unwanted sexual contact.

• More females (63%) than males (47%) indicated that a perpetrator used force or threats.

• Most perpetrators were acquaintances (58.9%) or spouses/partners (35.3%).

• The smallest number of perpetrators were strangers (13.4%).

• Many incidents of unwanted sexual contact (44%) and non-domestic assault (56%) occurred at parties.  

In addition to answering questions about their personal experiences, respondents were asked questions that assessed their attitudes about sexual assault, relationship violence, and stalking.

Respondents indicated the extent to which they agreed or disagreed with several statements. Respondents were instructed to choose from a range of responses from 1 (strongly agree) to 7 (strongly disagree).

On many items, females held stronger victim-supportive opinions than males. In general, however, respondents were

• supportive of victims of sexual assault and domestic violence, and
• knowledgeable about stalking.  

---

23 Ibid.
Children and Youth

Introduction

This segment contains information about child abuse, children who witness domestic violence, and sexual assault against young people. Both public and private entities are represented in this segment:

- **Children’s Advocacy Center**
  - located at MedCenter One Health Systems in Bismarck, ND

- **Child Abuse Clinic**
  - located at MeritCare Coordinated Treatment Center in Fargo, ND

- **North Dakota Kids Count!**
  - administered by the North Dakota State Data Center at North Dakota State University

- **Youth Risk Behavior Surveillance System**
  - administered by the North Dakota Department of Health and the North Dakota Department of Public Instruction

The Children’s Advocacy Center and the Child Abuse Clinic provide **direct services** to children who have been abused or neglected. North Dakota Kids Count! and the Youth Risk Behavior Surveillance System are statewide **systems of data collection**.
Children’s Advocacy Center

Agency

Medcenter One Health Systems
Children’s Advocacy Center
300 North Seventh Street
Bismarck, ND 58501
www.medcenterone.com

Agency Description

A program of Medcenter One Health Systems in Bismarck, ND, the Children’s Advocacy Center began as a task force and is now a community partnership.

It serves each county in North Dakota, but primarily the counties in the western part of the state. Its service area includes the four Native American Reservations, northern South Dakota, and eastern Montana.

The purpose of the Center is to

- offer a coordinated response to child-sexual-abuse investigations;
- provide on-site agency collaboration through a multi-disciplinary team; and
- protect children through prevention, investigation, assessment, prosecution, and treatment of child abuse.24

Database Description

The Center gathers and stores information about the children it serves. To date, there are 316 cases in the Center’s database, which includes various types of data:

- Client’s information
  - demographics
  - exam/procedure conducted at the Center
- Alleged offender’s information
  - demographics
  - relationship to the victim

24 Agency description was obtained through an informational packet provided by the Children’s Advocacy Center in Bismarck, ND.
• Information about the incident
  • type of abuse disclosed by the client (if any was disclosed)
  • disposition (“case founded,” “not founded,” or “unable to determine”)
  • whether the case was charged out criminally
  • who referred the case to the Center
  • any medical findings
  • type of abuse (physical, sexual, or both)

• Services recommended for the client

Results

The following results may be of interest:

• A majority of cases (75.6%) involved a child between the ages of three and ten.

• The child’s ethnic background was generally either Caucasian (73.1%) or Native American (21.9%).

• 67.0% of victims were female, and 30.2% were male.

• 51.0% of the offenders were between the ages of 25 and 40.

• The database shows that offenders appeared in each of the age ranges from age one to age 77.25

25 Database description and results were obtained through an informational packet provided by the Children’s Advocacy Center in Bismarck, ND.
Child Abuse Clinic

Agency

MeritCare Children’s Hospital
Coordinated Treatment Center
Child Abuse Clinic
720 4th Street North
Fargo, ND 58122
www.meritcare.com/specialties/more/ctc/child_protection.asp

Agency Description

The purpose of the Child Abuse Clinic at MeritCare Children’s Hospital is to offer a team-treatment approach in the

• diagnosis and
• prevention of child abuse.

The Program offers the following services:

• medical evaluation (including video colposcopy) for sexual abuse,
• diagnostic interviewing of the abused child by team members (when necessary),
• expert testimony in court cases,
• referrals to community agencies for appropriate treatment, and
• cooperation with county social service departments and other local agencies to provide supportive services.26

Data regarding domestic violence, sexual violence, or child abuse was not provided or was otherwise unavailable at the time of publication.

---

26 Agency description was obtained from information found on the MeritCare Coordinated Treatment Center website at http://www.meritcare.com/specialties/more/ctc/child_protection.asp.
North Dakota Kids Count!

Agency

North Dakota State Data Center
North Dakota State University
Agribusiness and Applied Economics
P.O. Box 5636
Fargo, ND 58105
www.ndsu.nodak.edu/sdc

Agency Description

The purpose of the North Dakota State Data Center (NDSDC) is to

- serve as the state’s official source of statistics on population and socioeconomic status;
- participate in Federal-State Cooperative Programs of Population Estimates and Projections;
- act as liaison to the U.S. Census Bureau; and
- disseminate U.S. Census data, as well as other data sets, to local users in North Dakota.

The NDSDC network is comprised of three coordinating agencies and 15 affiliates located in ten cities throughout North Dakota.27

Database Description

Administered by the NDSDC, North Dakota Kids Count! exists for the purpose of

- providing data about North Dakota children and families;
- promoting the well-being of North Dakota children;
- offering data-based public awareness activities; and
- encouraging policy decisions that enhance the capacity of communities to provide support networks for families, such that they can raise their children successfully.

---

27 Agency description was obtained from information found on the North Dakota State Data Center website at http://www.ndsu.nodak.edu/sdc/whoweare.htm.
After gathering data from various sources, North Dakota Kids Count! reports this data through an annual fact book. The fact book is divided into three sections:

(1) Overview
   • presents general considerations for children and families in the state.

(2) State, Regional, and County Profiles
   • offers early warning signs about areas of concern.

(3) Definitions and Data
   • includes information on population, family composition, economic condition, child care, education, and children who may be at risk.\(^{28}\)

Results

The “Definitions and Data” section of the fact book provides information about child abuse and neglect, as well as the number of children impacted by domestic violence.

- Statistics about child abuse and neglect came from the Division of Child and Family Services of the North Dakota Department of Human Services (NDDoH). These statistics are based on the total number of official reports made to NDDoH.

- Statistics about the number of children impacted by domestic violence were provided by the North Dakota Council on Abused Women’s Services.

The numbers of reports of child abuse and neglect in 2000 and 2001 were as follows:

- 4,055 reports in 2000.

Kids Count! estimated the percentage of children in North Dakota who were victims of child abuse and neglect:

- 6,982 children (4.34% of the total population) in 2000.
- 6,965 children (4.33% of the total population) in 2001.

\(^{28}\) Database description was obtained from information found on the North Dakota Kids Count website at http://www.ndkidscount.org/aboutKIDSCOUNT.htm.
Kids Count! supplied 2001 statistics for each of the eight regions of North Dakota:

According to victim-based data collected by the North Dakota Council on Abused Women’s Services, the number of children impacted by domestic violence in North Dakota in 2002 was

- 4,862 or 3.02% of the total population.\(^{29}\)

\(^{29}\) Results were based on data obtained from the 2002 and 2003 North Dakota Kids Count! Fact Books.
Youth Risk Behavior Surveillance System (YRBSS)

Agency

North Dakota Department of Health (NDDoH)
State Health Officer
600 E. Boulevard Avenue, Department 301
Bismarck, ND 58505
www.health.state.nd.us/

North Dakota Department of Public Instruction (NDDPI)
State Superintendent
600 E. Boulevard Avenue, Department 201
Bismarck, ND 58505
www.dpi.state.nd.us/dept/about.shtm

Agency Description

The purpose of the North Dakota Department of Health (NDDoH) is to

- ensure that North Dakota is a healthy place to live and that each person has an equal opportunity to enjoy good health and healthy lifestyles;
- encourage the protection and enhancement of health and the environment;
- promote the provision of quality health-care services for the people of North Dakota; and
- provide expertise in developing creative public health solutions through networking, facilitating local efforts, and collaborating with partners and stakeholders.

The purpose of the North Dakota Department of Public Instruction (NDDPI) is to

- provide leadership for a comprehensive system of educational opportunities for the people of North Dakota;
- serve as a resource for school districts and related education organizations in North Dakota;
- coordinate a comprehensive, systemic, collaborative plan that enhances educational opportunities and services;
- secure the human and financial resources to support a comprehensive system of educational opportunities;
- provide technical assistance, consultation, and other services that empower educational service providers; and
- foster quality education through the meaningful implementation of statues, regulations, policies, and procedures.\(^{30}\)

\(^{30}\) Agency descriptions were obtained from information found on the NDDoH and NDDPI websites at http://www.ndhealth.gov and http://www.dpi.state.nd.us/dept/about.shtm
Database Description

The YRBSS is conducted with representative samples of 9th through 12th graders every two calendar years, typically during spring semester.

Administered by the Centers for Disease Control and Prevention (CDC), the national survey provides data about high school students nationally. The state and local surveys, which are administered by the NDDoH and NDDPI, provide data pertinent to the state or the local school district.

The purpose of the YRBSS is to assist state and local health and education officials in

• implementing or modifying programs that address the behaviors of young people in a specific area,
• setting program goals and objectives,
• monitoring progress toward those goals,
• creating awareness of risk behaviors among young people, and
• providing youth with information and skills to avoid unhealthy behaviors.31

Results

During the spring of 2001, the North Dakota YRBSS was conducted with 1,599 students in grades 9 through 12.

Among other questions, the 2001 YRBSS presented two questions that related specifically to domestic or sexual violence:

(1) During the past 12 months, did your boyfriend or girlfriend ever hit, slap, or physically hurt you on purpose?

• A total of 1,591 students in grades 9 through 12 responded to this question.

• Of these, 11.7% (183) answered yes. They had been hit, slapped, or physically hurt by a boyfriend or girlfriend in the past 12 months.

(2) Have you ever been physically forced to have sexual intercourse when you did not want to?

• A total of 1,590 students in grades 9 through 12 responded to this question.

• Of these, 8.6% (135) indicated that they had been forced to have sexual intercourse.

31 Database description was based on information found in the “2001 North Dakota Youth Risk Behaviors” report.
During 2003, the YRBSS was conducted with 11,472 students in grades 9 through 12.

The 2003 YRBSS presented the same two questions relating to domestic or sexual violence:

1. During the past 12 months, did your boyfriend or girlfriend ever hit, slap, or physically hurt you on purpose?
   - 9.8% of respondents indicated that they had been hit, slapped, or physically hurt by a boyfriend or girlfriend in the past 12 months.

2. Have you ever been physically forced to have sexual intercourse when you did not want to?
   - 8.8% of respondents indicated that they had been forced to have sexual intercourse.\(^{32}\)

\(^{32}\) 2001 results were based on data obtained from the electronic report written by the North Dakota Department of Public Instruction. 2003 results were based on data obtained from the North Dakota Department of Public Instruction website at http://www.dpi.state.nd.us/health/912yrbs03.pdf.
Criminal Justice

Introduction

Three agencies within the criminal justice system are represented in this segment:

- North Dakota Department of Corrections and Rehabilitation
- Bureau of Criminal Investigation
- Crime Laboratory Division of the Office of the Attorney General
North Dakota Department of Corrections and Rehabilitation

Agency

Division of Adult Services
North Dakota Department of Corrections and Rehabilitation
3100 Railroad Avenue
Bismarck, ND 58501
www.state.nd.us/docr/

Division of Juvenile Services
North Dakota Department of Corrections and Rehabilitation
P.O. Box 1898
Bismarck, ND 58502-1898
www.state.nd.us/docr/djs/djs_home.htm

Agency Description

The purpose of the Department of Corrections and Rehabilitation (DOCR) is to provide

- direction,
- general administrative supervision,
- guidance, and
- planning of correctional facilities and programs in North Dakota.

The DOCR consists of two divisions:

- Adult Services and
- Juvenile Services.

The Division of Adult Services includes operations of

- the Prisons Division and
- the Field Services Division – formerly the Division of Parole and Probation.

The Prisons Division oversees the North Dakota State Penitentiary. Located in Bismarck, the penitentiary is the original and main prison complex in the state.33

33 Information regarding prisons in North Dakota was found on the North Dakota State Penitentiary (NDSP) website at http://www.state.nd.us/docr/prison/ndsp.htm.
The Field Services Division is responsible for the management of all adult, community-placed offenders. Division units and programs include

- **Community** Offender Services,
- **Institutional** Offender Services, and
- **Victim** Services.

The Division manages

- **halfway house** programming,
- **Day Reporting** Programming, and
- other **intermediate** programming that community-placed offenders require.\(^{34}\)

The Division of Juvenile Services (DJS) is responsible for the custody of “delinquent and unruly children” who are placed in its care by the courts. DJS oversees operation of

- the North Dakota **Youth Correctional Center** and
- **Community Services**, which includes eight regional offices.

Located southwest of Mandan, the North Dakota **Youth Correctional Center** (YCC) assumes responsibility for the detention, rehabilitation, instruction, and safekeeping of juveniles who are legally committed to the institution. YCC offers therapy, academic training, and vocational training.

The purpose of the **Community Services** program is to provide an array of placement options and services for troubled adolescents, including

- intensive **in-home** family services,
- intensive **supervision** and tracking,
- day **treatment**,
- **academic** remediation,
- high-risk **drug** and **alcohol** support groups,
- diversified **occupations** (a vocational program in school districts), and
- detention **support** services (designed to reduce the number of juveniles in adult jails).\(^{35}\)

**Data regarding domestic violence, sexual violence, or child abuse was not provided or was otherwise unavailable at the time of publication.**

\(^{34}\) Agency description was obtained from information found on the North Dakota Department of Correction and Rehabilitation (DOCR) website at http://www.state.nd.us/docr/docr/DOCRhistory.htm.

\(^{35}\) Agency description was obtained from information found on the DOCR Division of Juvenile Services website at http://www.state.nd.us/docr/djs/djs_home.htm.
Agency

The purpose of the Bureau of Criminal Investigation (BCI) is to

- assist local, state, and federal law enforcement agencies in the investigation of crimes within North Dakota;
- maintain the state’s criminal history records system;
- issue concealed weapons permits;
- maintain offender registration information; and
- coordinate training and licensing of North Dakota law enforcement officers.

Based on data collected in North Dakota, BCI publishes the “Annual Crime Report” the “Annual Domestic Violence Report,” and the “Annual Homicide Report.” BCI also has full law enforcement and arrest authority throughout the state.36

Database Description

- Annual Crime Report

Data collected in the “Annual Crime Report” is compiled from the “Uniform Crime Report” (UCR), which is a listing of crime and arrest statistics as reported by local law enforcement throughout North Dakota.

Essentially, the UCR is the compilation of crime incident and arrest data for North Dakota. Forty-three sheriff’s departments and 28 police departments report to the UCR. These departments can report in two ways:

- incident-based reporting, in which the department uses a standard incident form to collect detailed information about each specific incident; and

- summary reporting, which involves a tally system to count the number of offenses and arrests.

36 Agency description was obtained from information found on the North Dakota Office of the Attorney General’s website at http://www.ag.state.nd.us/BCI/BCI.htm.
The purpose of the UCR is to use an index of crimes to measure the extent, distribution, and fluctuation of crime. This index contains information on violent crimes that are broken into subcategories: murder/non-negligent manslaughter, forcible rape, robbery, and aggravated assault. The UCR also presents data on property crimes, which include burglary, larceny/theft, and motor vehicle theft.

The UCR presents both offense data and arrest data.

**Offense data** involves

- the number of crimes,
- type/value of stolen property,
- information about homicide, and
- information about any law enforcement officers killed or assaulted.

**Arrest data** includes

- the number and type of offenses,
- number and type of offenses involving juveniles,
- number of persons arrested (by offense), and
- characteristics of persons arrested.

Because a number of victims do not report crimes to law enforcement, and because a number of law enforcement agencies do not report to the UCR program, the UCR can present a conservative picture of crime in North Dakota.

- **Annual Domestic Violence Report**

  The 2001 Domestic Violence Report compares domestic violence in North Dakota over a four-year period. Data includes information on domestic violence offenders, arrestees, and victims:

  - race, gender, and age of the offender;
  - substance abuse by the offender and arrestee(s);
  - race, gender, and age of the victim;
  - analysis regarding juvenile victims, elderly victims, and other victims of domestic violence; and
  - the relationship between homicide and domestic violence.

- **Annual Homicide Report**

  The Annual Homicide Report is based on the UCR definition of murder and non-negligent manslaughter. It does not include attempts to kill, assaults with a deadly weapon, suicides, accidental deaths, justifiable homicides, or deaths caused by gross negligence.
The 2001 Annual Homicide Report provides comparisons across the years 1978 through 2001, offering

- rates of homicide,
- summary of incidents,
- characteristics of victims and assailants,
- information about weapon use, and
- assessments as to whether the homicide resulted from a domestic violence incident.  

Results

According to the UCR, 48% of all reported physical violence cases in North Dakota in 2001 were incidents of domestic violence.

- These “domestic violence” incidents were incidents in which the reported relationship could be classified as “a family or household member.”

- Using this definition, reports of domestic violence incidents in North Dakota increased by 7% from 2000 to 2001.

Assaults, both domestic and non-domestic, took place predominantly in the residence or home.

- 83% of domestic assaults took place in the home.

- Just over 8% of domestic assaults occurred at a highway, road, or parking lot.

- 39% of non-domestic assaults occurred in the home.

- 24% of non-domestic assaults took place at a highway, road, or parking lot.

The most common weapons were the hands and feet, which were used in 88% of the total assault cases.

- 90% of domestic assaults involved hands and feet as weapons.

- Firearms and knives were more likely to be used as weapons in reports of non-domestic assaults.

---

37 Database description was obtained from information found in North Dakota’s “Annual Crime Report,” “Annual Domestic Violence Report,” and “Annual Homicide Report.”

Domestic and Sexual Violence in North Dakota 62
Compared to rural areas, counties with an urban area showed a higher rate of domestic violence reporting per capita.

- 85% of domestic violence reports came from urban areas. 15% of reports were in rural areas.

The UCR offers the following demographic information about offenders:

- 78% of domestic violence perpetrators were Caucasian, 14% were Native American, nearly 6% were African American, and less than 1% were Asian American.

- The most common age of an offender was 21, and the majority of offenders were between the ages of 18 and 40.

- 73% of offenders were male, and 27% of offenders were female.

- In 48.8% of domestic assault cases, the offender used alcohol.

- The offender used alcohol in 51% of cases of non-domestic assault.

- When committing either domestic or non-domestic assault, males were more likely to be under the influence of alcohol. (72% of male offenders compared to 22% of female offenders.)

- The number of offenders of both genders rose steadily between 1998 and 2001.

According to the UCR, a “victim” is defined as a natural person who has suffered direct or threatened physical, financial, or emotional harm, when there is probable cause to believe that the harm has been caused by the commission of a criminal act.

The UCR offers the following demographic information about victims:

- 80% of victims were Caucasian, and 13% were Native American.

- 75% of domestic violence victims were between the ages of 17 and 39.

- 70% of domestic violence victims were female.

- In 2001, the number of female victims increased by 8% from the previous year. The number of male victims increased by 7% from the previous year.
For all types of violence, the **offender was known** to the victim in **74%** of the cases.

- When **physical violence** was present, the offender was the victim’s **partner** in **24%** of cases.\(^{38}\)

---

\(^{38}\) Results were based on information found in the 2001 “Uniform Crime Report.”
Agency Description

The purpose of the Crime Laboratory Division is to provide scientific support to the criminal justice system. To this end, the Division uses accepted techniques in the

- analysis,
- identification, and
- comparison of physical and toxicological evidence.

This evidence may then be used in the investigation and prosecution of criminal offenses.

The Division is composed of three Sections:

- The duties of the Administrative Section include
  - evidence disposition,
  - information processing, and
  - tracking certifications of licensed certified chemical test operators.

- The Forensic Section offers technical assistance to the criminal justice system in the investigation of crime.

The laboratory accepts evidence from prosecutors, defense counsel, and law enforcement officers – including municipal, county, state, federal, and military.

The Forensic Section provides examinations such as

- arson analysis;
- DNA testing;
- drug identification;
- firearm, paint, and tool mark examination;
- tire and footwear impressions; and
- trace evidence examination.
• The **Toxicology Section** provides **technical assistance** to the criminal justice system in the investigation of impaired driving due to the influence of ethyl alcohol or other substances.

It also **analyzes samples** involved in unknown, unattended, or questionable death investigations.\(^{39}\)

**Database Description**

The Crime Laboratory Division gathers data on the number of **Gross Sexual Imposition cases** submitted each calendar year. Data is collected statewide from

- police departments,
- sheriffs’ departments,
- the Bureau of Indian Affairs, and
- Three Affiliated Tribes Native American Reservation.

**North Dakota Century Code 12.1-20-03** provides the legal definition of gross sexual imposition:

1. A person who engages in a **sexual act** with another, or who causes another to engage in a sexual act, is guilty of an offense if:
   a. He compels the victim to submit by **force** or by **threat** of imminent death, serious bodily injury, or kidnapping, to be inflicted on any human being;
   b. That person or someone with that person's knowledge has substantially **impaired the victim's power** to appraise or control the victim's conduct by administering or employing without the victim's knowledge intoxicants, a controlled substance as defined in chapter 19-03.1, or other means with intent to prevent resistance;
   c. He knows that the **victim is unaware** that a sexual act is being committed upon him or her;
   d. The victim is **less than fifteen years old**; or
   e. He knows or has reasonable cause to believe that the other person suffers from a **mental disease or defect** which renders him or her incapable of understanding the nature of his or her conduct.

2. A person who engages in **sexual contact** with another, or who causes another to engage in sexual contact, is guilty of an offense if:
   a. The victim is **less than fifteen years old**; or
   b. He compels the victim to submit by **force** or by **threat** of imminent death, serious bodily injury, or kidnapping, to be inflicted on any human being.

3. An offense under this section is a **class A felony** if in the course of the offense the actor inflicts **serious bodily injury** upon the victim or if his conduct violates subdivision a or d of subsection 1. Otherwise the offense is a **class B felony** (pp. 1-2).\(^{40}\)

---

\(^{39}\) Agency description was obtained from information provided by the North Dakota Office of the Attorney General, Crime Laboratory Division.

Domestic and Sexual Violence in North Dakota 66
Results

Data was available for the years 2001, 2002, and the first portion of 2003:

- In 2001, a total of 66 Gross Sexual Imposition cases were submitted to the Crime Laboratory Division.
- In 2002, a total of 77 Gross Sexual Imposition cases were submitted.
- From January 1, 2003 through July 24, 2003, a total of 53 Gross Sexual Imposition cases were submitted.

Agency

Division of Health Promotion and Education
North Dakota Department of Health
600 E. Boulevard Avenue
Bismarck, ND 58505-0200
www.ndhealthpromotion.com
www.health.state.nd.us/

Agency Description

The purpose of the Division of Health Promotion and Education is to

- enable communities to promote healthy behaviors that prevent and control chronic disease,
- reduce healthcare costs, and
- improve the quality of life.41

Database Description

The Behavioral Risk Factors Surveillance System (BRFSS) was created by the Center for Disease Control and Prevention (CDC) and is jointly administered with the state health department.

The purpose of the BRFSS is to enable health officials to

- plan public health programs;
- set priorities for disease prevention and health promotion;
- enhance existing chronic disease surveillance systems;
- inform the media, public health professionals, state department heads, and the public about health behaviors that may lead to disease, disability, or death;
- develop public health policies relating to safety belt use, tobacco control, and oral health; and
- develop state plans for the cancer, diabetes, and tobacco control programs.

Conducted annually with adults in North Dakota, the BRFSS is random-digit dialed survey.

---

41 Agency description was obtained from information found on the North Dakota Department of Health/Division of Health Promotion and Education website at http://www.ndhealthpromotion.com.
The questionnaire itself contains a number of **modules**:

- **Fixed Core**
  - questions asked every year.

- **Rotating Core I**
  - questions asked on odd years.

- **Rotating Core II**
  - questions asked on even years.

- **Optional Modules**
  - questions developed by the Center for Disease Control and selected by the North Dakota Department of Health.

- **State Modules**
  - a list of CDC-approved questions that are administered in individual states.\(^{42}\)

The BRFSS questionnaire does not include questions about attitudes or knowledge; instead, it contains questions about **behaviors**. Thus, the BRFSS can enable state officials to monitor major behavioral risks among adults in North Dakota – particularly those behavioral risks most associated with **premature morbidity and mortality**.\(^{43}\)

**Results**

Three questions on the 2002 questionnaire were relevant to **domestic or sexual violence**:

(1) As a child, did you ever see or hear one of your **parents or guardians** being hit or **physically hurt** by their spouse or partner?

- The total number of respondents to this question was **2,996**.

- 8.8% (248) answered yes to this question. They **had witnessed or heard one of their parents or guardians being hit or physically hurt** by their spouse or partner.

\(^{42}\) Information obtained for this portion of the database was found on the CDC website at [http://www.cdc.gov/brfss/databased.htm#n](http://www.cdc.gov/brfss/databased.htm#n).

\(^{43}\) Database description was obtained from information found on the National Center for Chronic Disease Prevention and Health Promotion website at [http://www.cdc.gov/brfss/about.htm](http://www.cdc.gov/brfss/about.htm).
These “yes” respondents (248) were considered at risk of being a victim or perpetrator of subsequent abuse of an intimate partner. They had some of the following characteristics:

- 54.6% (153) were female, and 45.5% (95) were male.
- 59.2% (134) were either married or were a member of an unmarried couple, 23.1% (50) had never been married, and 13.7% (47) had been divorced.
- 23.3% (55) had experienced physical abuse as a child.
- 10.1% (24) had experienced sexual abuse as a child.
- 5.6% (18) had experienced sexual abuse as an adult.

(2) Did you ever have injuries or were you ever physically hurt by your parents, guardians, their spouse, partner, boyfriend, or girlfriend during your childhood?

- The total number of respondents to this question was 2,996.
- 4.8% (131) answered yes to this question. They had been injured or physically hurt by their parents, guardians, partner, boyfriend, or girlfriend as a child.
- These “yes” respondents had the following characteristics:
  - 58.1% (85) were female, and 41.9% (46) were male.
  - 61.7% (71) were either married or were a member of an unmarried couple, 19.7% (24) had never been married, and 14.5% (28) were divorced.
  - 42.1% (55) had been exposed to abuse as a child.
  - 18.9% (24) had experienced sexual abuse as a child.
  - 5.5% (10) had experienced sexual abuse as an adult.

(3) Were you forced to have sex before your 18th birthday?

- The total number of respondents to this question was 2,996.
- 2.4% (71) answered yes to this question. They had been forced to have sex before their 18th birthday.
General characteristics of the “yes” respondents included the following:

- 77.6% (59) were female, and 22.4% (12) were male.
- 66.7% (39) were either married or were a member of an unmarried couple, 14.9% (12) had never been married, and 13.4% (14) were divorced.
- 36.8% (24) had experienced physical abuse as a child.
- 36.8% (24) had been exposed to abuse as a child.
- 7.9% (8) had experienced sexual abuse as an adult.\(^4\)

\(^4\) Results were based on data compiled by Dr. Abe Sahmoun of the Department of Medicine at the University of North Dakota, in collaboration with the North Dakota Department of Health.
Agency Description

The purpose of the Injury Prevention Division is to reduce the number and severity of injuries to North Dakotans, with special emphasis on injuries to children.

The Program provides information on:

- car safety seats,
- bicycle safety,
- suicide prevention,
- consumer product safety, and
- other injury-specific topics.45

Database Description

The Pregnancy Risk Assessment Monitoring System (PRAMS) is an ongoing, state-specific, population-based surveillance system. It is designed to identify and monitor selected maternal behaviors and experiences that occur before, during, or after pregnancy.

Developed by the Centers for Disease Control and Prevention (CDC), the purpose of PRAMS is to describe and assess:

- high-risk pregnancy risk factors,
- access to health care services, and
- other maternal and child health issues.

The goal is to improve the health of mothers and babies.

Using a point-in-time method, data is obtained from a sample of women who have recently given birth to a live infant. Participants in PRAMS are chosen based on information held in the state’s birth certificate file.

---

45 Agency description was obtained from information found on the North Dakota Department of Health/Injury Prevention Division website at http://www.ndmch.com/injury-prevention/default.asp.
Women are considered **eligible** to participate in PRAMS if they

- reside in **North Dakota** and
- have given birth to a live infant during the **current month**.

The birth certificate file is used to separate participants into **two research groups**:

- women who **used Medicaid** as the primary source of payment for delivery of their child, and
- those who **did not use Medicaid**.

This division permits some degree of analysis and comparison based on **income**.

After selection, women are mailed a detailed **questionnaire**. Follow-up **telephone** calls are made to those who did not respond to the written survey.

Available data reflects the frequency of responses. It also includes a **cross reference** to other survey questions regarding such issues as insurance status, Medicaid/non-Medicaid use, age, race, education, pre-pregnancy weight, employment status, tobacco and alcohol use, and feelings about becoming pregnant prior to pregnancy.⁴⁶

**Results**

The 2002 PRAMS questionnaire posed three larger questions that dealt with **physical abuse**.

(1) In the first question, respondents were asked generally about “things that may have happened during the **12 months before**” their new **baby was born**.

Then they were asked specifically if they had been “in a **physical fight**” during this period of time.

- **900** respondents answered this question.
- Of these, **3.4%** (42) answered yes – they had been in a **physical fight** during the **twelve months prior to their baby’s birth**.
- **96.6%** (858) of respondents answered **no**.

---
⁴⁶ Information used for the database description was obtained from the “PRAMS Mail/Telephone Point-in-time Survey Protocol 2001”.
(2) Presented in three parts, the next question addressed physical abuse that may have occurred during the 12 months prior to getting pregnant.

(A) Respondents were asked if, during the 12 months before they became pregnant, their husband or partner pushed, hit, slapped, kicked, choked, or physically hurt them in any other way.

- 902 respondents answered this question.
- Of these, 3.4% (42) answered yes – they had been hit, slapped, kicked, choked or physically hurt by their husband or partner during the 12 months before getting pregnant.

(B) In the second part of this question, respondents were asked if, during the 12 months before they became pregnant, anyone else had physically hurt them in any way.

- 903 respondents answered this question.
- Of these, 2.5% (27) answered yes – someone other than their husband or partner had physically hurt them during the 12 months before getting pregnant.

(C) The final question in this series was a reversal of previous questions. Respondents were given a statement with which they could agree or disagree: “There was no abuse” during the 12 months before they became pregnant.

For this statement, a response of “no” would mean that abuse had occurred; a response of “yes” would mean that abuse had not occurred.

- 901 respondents answered this question.
- Of these, 5.3% (63) answered no. Their response suggests that abuse had occurred during the 12 months prior to becoming pregnant.

(3) Presented in two parts, the last question pertained to physical abuse during the most recent pregnancy.

(A) Respondents were asked if, during their most recent pregnancy, their husband or partner pushed, slapped, kicked, choked, or physically hurt them in any other way.

- 902 respondents answered this question.
- Of these, 2.6% (31) answered yes – they had been physically hurt by their husband or partner during their most recent pregnancy.
(B) Respondents were asked if, during their most recent pregnancy, anyone else had physically hurt them in any way.

- 901 respondents answered this question.
- Of these, 1.0% (10) answered yes – they had been physically hurt by someone other than their husband or partner during their most recent pregnancy.\

Division of Emergency Health Services

Agency

Division of Emergency Health Services
North Dakota Department of Health
600 East Boulevard Avenue, Dept. 301
Bismarck, ND 58505-0200
www.ndhealth.com

Agency Description

The purpose of the Division of Emergency Health Services (DEHS) is to serve as North Dakota's lead Emergency Medical Services (EMS) agency. The DEHS is responsible for

- licensure of ambulance services;
- voluntary certification of quick response units and rescue services;
- training, testing and certification of EMS personnel; and
- establishment of a statewide trauma response system.48

Database Description

Beginning in July of 2004, the DEHS plans to implement the North Dakota State Online Ambulance Reporting (SOAR) Program. By collecting data from ambulance reports in North Dakota, this program will enable the DEHS to compile a range of data relevant to domestic and sexual violence. In particular, data will be available regarding injury type, cause of injury, and onsite observations by emergency personnel.

Six months after implementation, the DEHS intends to invite comment on SOAR. At this time, the database could be refined to include specific categories regarding domestic or sexual violence.49

Data regarding domestic violence, sexual violence, or child abuse was not provided or was otherwise unavailable at the time of publication.

48 Agency description was obtained from information found on the Division of Emergency Health Services website at http://www.ndhealth.com
49 Database description was obtained from information found on the Division of Emergency Health Services website at http://www.ndhealth.com and from personal communication with the DEHS.
Agency

Division of Children and Family Services
North Dakota Department of Human Services
600 East Boulevard
Bismarck, ND 58503
www.state.nd.us/humanservices/services/childfamily/index.html

Agency Description

The purpose of the Division of Children and Family Services (DCFS) is to

- administer programs and services for child welfare;
- approve applications for adoption in the state;
- contract with private child-placement agencies for provision of adoption services for children who are refugees or have special needs;
- provide program supervision and technical assistance for the delivery of public children’s services through eight regional human service centers and 53 county social service boards; and
- administer
  - the interstate compact on the placement of children,
  - intensive in-home services,
  - early childhood services,
  - child protection services,
  - Child Fatality Review Panel,
  - family-focused services,
  - foster care services,
  - services to pregnant teens,
  - parent aide services,
  - prime-time child care services,
  - wrap around services,
  - the Children's Trust Fund, and
  - other children’s services.

In the interests of quality care and recipients' safety, Children and Family Services also licenses or regulates agencies or individuals that provide children’s services.50

50 Agency description was obtained from information found on the North Dakota Department of Human Services Division of Children and Family Services website at http://lnotes.state.nd.us/dhs/dhsweb.nsf.
Database Description

DCFS collects and compiles data from reports of child abuse and neglect in North Dakota. DCFS also maintains data regarding assessments that follow reports.

Results

DCFS has supplied a fact sheet that lists the following information for 2002:

4,109 “full assessments” of families were completed as the result of reports of child abuse and neglect.

- Of the full assessments, 14.3% involved “spouse abuse.”
- Of the full assessments, 10% of cases listed “chronic family violence” as a stress factor.
  - “Chronic family violence” includes intergenerational violence.
- In 18.3% (782) of cases, the determination was made that services were required.
  - Among these cases, violence indicators were higher than average. For instance, 24% of these assessments listed “spouse abuse” as a stress factor.

---

51 Results were obtained from a fact sheet entitled “Child Protection Services and Domestic Violence,” provided by the Division of Children and Family Services.

North Dakota Department of Human Services
600 East Boulevard
Bismarck, ND 58503
www.state.nd.us/humanservices/services/mentalhealth

Agency Description

The **purpose** of the Division of Mental Health and Substance Abuse Services is to provide statewide leadership in the

- **planning,**
- **development,** and
- **oversight** of a system of care.

This system of care includes **children, adults, and families** that experience

- **severe emotional** disorders,
- **mental** illness, and/or
- **substance abuse** issues.

Comprised of two units – the **Mental Health Services Unit** and the **Substance Abuse Services Unit** – the Division offers consultation and technical assistance to citizens, agencies, or private providers in North Dakota.⁵²

**Data regarding domestic violence, sexual violence, or child abuse was not provided or was otherwise unavailable at the time of publication.**

⁵² Agency description was obtained from information found on the North Dakota Department of Human Services/Division of Mental Health and Substance Abuse website at http://lnotes.state.nd.us/dhs/dhsweb.nsf.
Agency Description

The purpose of the Aging Services Division is to

- provide programs and services for older adults and persons with physical disabilities, such that they are supported to live safely and productively in the least restrictive, appropriate setting;
- enhance the ability of individuals to maintain independence in their own homes and communities;
- actively advocate for individual life choices; and
- develop quality services in response to the needs of vulnerable adults, persons with physical disabilities, and an aging society in North Dakota.

An Older Rights Program has been established to provide information and intervention to vulnerable adults so they can more fully exercise their rights. The program serves

- residents of nursing facilities, assisted living facilities, basic care homes, and hospital swing beds – in transitional and sub-acute settings;
- families and friends of residents, as well as the general public;
- employees and administrators of long-term care facilities;
- Vulnerable Adult Protective Services;
- Legal Services to the Elderly; and
- various regulatory, certification, and other agencies.53

---

53 Agency description was obtained from information found on the North Dakota Department of Human Services Aging Services Division website at http://lnotes.state.nd.us/dhs/dhsweb.nsf/ServicesPages/AginServices.
Database Description

Based on reports made to Vulnerable Adult Protective Services, Aging Services collects and compiles data regarding the abuse, neglect, and exploitation of people who are 60 years of age or older. This data includes information on the presenting concern, source of referral, and level of danger.

Results

Results were available for the period between October 2001 and September 2002.

- During this period, there were 602 new cases of individuals who required vulnerable adult protective services or other forms of services.

- A case could be considered “new,” however, even if the person had previously received services. As a person’s physical or other abilities change with time, a once stable situation may deteriorate and concerns about neglect or abuse may resurface.

- The reasons for referring an individual for vulnerable adult protective services were as follows:
  
  - 67% of the referred individuals neglected themselves or did not properly care for themselves (i.e. did not take medication, pay bills on time, etc.).
  
  - 14% were neglected.
  
  - 10% were abused.
  
  - 9% were exploited financially.

- These individuals were referred by
  
  - agencies (32%),
  - medical/home health providers (25%),
  - family (18%),
  - community members (17%),
  - legal/judicial system (4%), and
  - themselves (3%).
• The level of danger varied among the referrals.
  • 82% were considered to be a non-emergency.
  • 8% were considered to be an emergency.
  • 10% were considered to be a situation of imminent danger to the individual.

• General demographics for the 2002 cases were as follows:
  • 69% were 60 years of age or older.
  • 58% were female.
  • 93% were Caucasian.
  • 67% were single/widow/widower, 19% were married, and 13% were divorced.
  • 54% lived alone, 36% lived with a spouse or another family member, and 10% lived with a non-relative.
  • 71% did not have dementia, and 29% did have some form of dementia.\(^\text{54}\)

Results were also available for the period between October 2002 and September 2003.

• During this period, there were 527 new cases of individuals who required vulnerable adult protective services or other forms of services.

• The reasons for referring an individual for vulnerable adult protective services were as follows:
  • 63% of the referred individuals neglected themselves or did not properly care for themselves.
  • 17% were neglected.
  • 11% were abused.
  • 9% were exploited financially.

• These individuals were referred by
  • agencies (21%),
  • medical/home health providers (29%),
  • family (19%),
  • community members (19%),

\(^\text{54}\) 2002 results were based on data obtained from the “2002 Department of Human Services Fact Sheet” on Vulnerable Adult Protection Services.
• legal/judicial system (7%), and
• themselves (5%).

• The level of danger varied among the referrals.

• 83% were considered to be a non-emergency.

• 11% were considered to be an emergency.

• 6% were considered to be a situation of imminent danger to the individual.

• General demographics for the 2003 cases were as follows:

  • 72% were 60 years of age or older.
  • 60% were female.
  • 95% were Caucasian.
  • 67% were single/widow/widower, 22% were married, and 10% were divorced.
  • 54% lived alone, 39% lived with a spouse or another family member, and 7% lived with a non-relative.
  • 71% did not have dementia, and 29% did have some form of dementia.\textsuperscript{55}

\textsuperscript{55} 2003 results were based on data obtained from the “2003 ND Department of Human Services Fact Sheet” on Vulnerable Adult Protective Services.
Federal Grant Programs

Introduction

Agencies in North Dakota have received federal grants for violence prevention, intervention, and education. These grants have been distributed by the Injury Prevention Division of the North Dakota Department of Health.

In many cases, the grantees are agencies whose data has been presented in earlier sections of this document. Data is presented here, however, in order to reflect the type and scope of data the federal government has collected about services in North Dakota.

Agency

Injury Prevention Division
North Dakota Department of Health
600 East Boulevard Avenue, Department 301
Bismarck, ND 58505-0200
www.ndmch.com

Agency Description

The Injury Prevention Division is a division of the Community Health Section at the North Dakota Department of Health. The purpose of the Community Health Section is to coordinate public health education and intervention activities that include

- health risk and injury reduction;
- promotion of wellness, optimal nutrition, and dental health; and
- reduction of tobacco use.

The Injury Prevention Division distributes federal grants including

- Family Violence Prevention and Services,
- Rape Prevention and Education, and
- STOP Violence Against Women Formula Grant.

Federal grants are issued in order to

- establish, maintain, and expand programs that prevent family violence;
- provide prevention education programs to schools; and
- encourage the development and strengthening of law enforcement and prosecution.56

56 Agency description was obtained from information found on the North Dakota Department of Health Injury Prevention Division website at http://www.ndmch.com/injury-prevention/default.asp.
Family Violence Prevention and Services

Federal Agency

Department of Health and Human Services

Program Purpose

The purpose of the Family Violence Prevention and Services grant program is to assist states and tribes in establishing, maintaining, and expanding programs and projects that

- prevent family violence and
- provide immediate shelter and related services for victims of family violence and their dependents.

Database Description

Through the Federal Family Violence Collection Form, data is collected from the 19 domestic violence and rape crisis centers in North Dakota. This data is then included in the Federal Family Violence Annual Report. Pertinent data includes

- number of victims served,
- number of victims who received shelter,
- average length of stay,
- information regarding whether the situation was resolved,
- number of volunteers who assisted the agency, and
- information regarding related services and assistance.

Results

From October 1, 2001 through September 20, 2002, the following results were obtained from North Dakota:

- Eight shelter facilities were in operation.

- These shelters housed 409 women, 2 men, 47 young adults (ages 13 to 18), 271 children (birth to age 12), and 16 people age 65 or older.

  - In their data collection, some agencies did not distinguish between young adults and children. These agencies sheltered 101 children (birth to age 18).

- Average length of stay in shelter facilities was 185 days.

- 103 women and children were turned away from shelter due to lack of space.
• **20 women and children** were **referred** to other shelters due to **lack of space**.

• Agencies provided **additional shelter** through local motels, homeless shelters, and their own transitional housing units.

• **107 individuals returned** to their previous living situation, and **257 relocated** to a new living situation.

• **1,303 sessions of individual counseling** (with a professionally-trained counselor) were provided by victim service agencies.

• **377 sessions of group counseling** were also provided.

• **12,515 crisis intervention/hotline calls** were received.

• **19,144 information and referral calls** were received.

• **138 individuals** received **batterers’ support services**, which included group therapy, information classes, eight-week education classes, and/or crisis intervention through crisis lines.

• **Victims** had the following demographic characteristics:
  
  • **78% (4,254)** were **Caucasian**, **14% (773)** were **Native American**, **2% (93)** were **Hispanic**, **1% (57)** were **African American**, and **1% (65)** were **Asian/Pacific Islander**.
  
  • **3% (140)** were **physically challenged**.
  
  • **1% (64)** were **age 65 or older**.  

---

57 Database description and results were based on data obtained from the “Family Violence Prevention and Services Act Program and Performance Report” for October 1, 2001-September 30, 2002.
Rape Prevention and Education

Federal Agency

Department of Health and Human Services,
Centers for Disease Control and Prevention

Program Purpose

The purpose of the Rape Prevention and Education (RPE) grant program is to

- provide prevention education programs to schools, civic groups, and the general public; and
- offer training to health professionals, law enforcement agencies, and rape crisis center volunteers and staff.

Database Description

Each year, grant recipients submit a self-report to the Rape Prevention and Education Grant System. The self-report addresses

- staff and budget allocations,
- training for professionals,
- educational seminars,
- hotline services,
- distribution of informational materials,
- partnership activities,
- RPE surveillance, and
- updates on goals and objectives for the program.

During calendar year 2002, nineteen rape crisis centers and one other non-profit group received RPE funds. Each year, these rape crisis centers have supplied data to both the RPE Grant System and to the Coalition Against Sexual Assault in North Dakota (CASAND). Any discrepancy between RPE data and CASAND data occurs because of differing definitions of data categories.

Results

In 2002, the RPE recipients provided a total of 122 training sessions for professionals.

- 1,940 participants attended the training sessions.
- Evaluation of the training sessions took place through pre- and post-tests and written evaluations.
• **Target populations** for the training sessions included college/university personnel, doctors, health departments, health professionals, human resources, law enforcement, lawyers/judges, mental health personnel, nurses, the private sector, rape crisis center staff, social services, substance abuse professionals, teachers, and volunteers.

• Grantee programs listed **additional populations** that received **training**: hair stylists, church groups, VFW Women, Children’s Justice Alliance, rural directors of domestic violence/rape crisis programs, Youth Advocacy Committee, and clergy.

• **Topics of the training sessions** included the following: connections between alcohol-use and rape, causes of rape, differences between consent and coercion, dating violence, drug-facilitated rape, disclosure response, how to respond to rape, impacts of rape, legal/policy information, media advocacy, profile of offenders, oppression, rape prevention, role of advocate, role of bystander(s), risk reduction, Sexual Assault Nurse Examiners/Sexual Assault Response Teams (SANE/SART), sexual harassment, self defense, what to do if raped, and violent music videos and lyrics.

The same twenty programs provided **892 sessions of educational seminars**.

• **677 people participated** in these sessions.

• Not all agencies conducted evaluations of their educational seminars. The agencies that did complete **evaluations** used pre- and post-tests, written evaluations, handouts, professional evaluation, and the Likart scale.

• **Target populations** for these seminars included college students, elderly people, elementary school students, female only, general public, high school students, male only, male and female, middle school students, parents, racial minorities, survivors, participants in an alcohol treatment program, and adult/youth chemical dependency group.

• **Topic areas** consisted of the following: connections between alcohol and rape, difference between consent and coercion, dating violence, drug-facilitated rape, gender roles, healthy relationships, healthy sexuality, impact of rape, masculinity, media violence, oppression, rape as a crime, rape culture, rape myths, rape statistics, role of bystander(s), risk reduction, sexual harassment, self defense, what to do if raped, and student leadership skills.
775 individuals received rape crisis intervention services from the 19 victim service agencies in North Dakota.

- The types of services offered were crisis intervention, support during hospital or clinic examinations, advocacy at court hearings, assisting with emergency shelter, counseling services, and 24-hour crisis lines.

- 612 young adults (ages 13 to 17) received rape crisis intervention services.

- Services were provided to 25 children (ages 18 and younger) who were victims of attempted rape.  

---

58 Results were based on data obtained from the “North Dakota 2002 Rape Prevention and Education Grant Annual Report”.  

Domestic and Sexual Violence in North Dakota 92
STOP Violence Against Women Formula Grant Program

Federal Agency

Office of Justice,
Violence Against Women Office

Program Purpose

The **purpose** of the STOP Violence Against Women Formula Grant Program is to assist states and tribes as they encourage

- the development and strengthening of effective **law enforcement and prosecution strategies** that address violent crimes against women, and
- the development and strengthening of **victims services** in cases that involve violent crimes against women.

Database Description

Data is collected through the *Subgrant Award and Performance Report* (SAPR), which is completed by STOP administrative agencies at the state level. Primarily, the database includes information about

- public and private **agencies** that applied for STOP grant funds, and
- **services** provided by grantee agencies.\(^{59}\)

Results

For the 2002 grant year, **59 agencies applied** for STOP grant funds, and **53 applicants received** grant funds.

STOP funds were **distributed** in the following ways:

- **Victim services** funds, 30%
- **Law enforcement** funds, 24%
- **Prosecution** funds, 21%
- **Court** funds, 5%
- **Discretionary** funds, 15%

\(^{59}\) Database description was obtained from information found in the U.S. Department of Justice Office of Justice Program Subgrant Award and Performance Report (SAPR) for the STOP Violence Against Women Formula Grant Program.
The Violence Against Women Act (VAWA) requires that the funds be allocated in the following ways:

- **Victim services** funds, 30%
- **Law enforcement** funds, 25%
- **Prosecution** funds, 25%
- **Court** funds, 5%
- **Discretionary** funds, 15%

In 2002, funds were *unspent* in the categories of **law enforcement and prosecution**. Those remaining funds were allocated as additional funding in the following year.

In 2002, **grant funds** were applied to a variety of projects:

- 59.4% of agencies applied the funds to **victim support services**.
- 28.3% of agencies conducted **training**.
- 12.0% of agencies addressed **stalking**.
- 10.9% of agencies focused on **Native American populations** specifically.
- 6.4% of agencies directed the funds to **special units** (units specifically designated to investigate domestic violence cases).

**Victim services** included crisis counseling, follow-up contact, hotline services, information/referral, personal advocacy, and telephone contacts.

- 41.5% of these services were offered **county-wide**.
- 11.2% were offered **statewide**.
- 7.0% were offered to those in **Native American** tribes.\(^6^0\)

---

\(^6^0\) Results were obtained through personal communication with the ND Department of Health/Injury Prevention Division, and from information found in the U.S. Department of Justice Office of Justice Program Subgrant Award and Performance Report (SAPR) for the STOP Violence Against Women Formula Grant Program.
Conclusion

This project is a reality because of the willingness of many people and agencies across North Dakota to collaborate. By sharing their data, these agencies have shared their knowledge and expertise. They have helped to raise the level of knowledge and expertise among readers, service providers, and other collaborators.

This project has focused on the specifics and details regarding domestic and sexual violence. These details, however, are parts of a larger, more comprehensive whole. From the beginning, the vision for this project has been to see the trees and then create a picture of the forest.

Toward this end, future plans include seeking support for coordinated data-collection efforts, obtaining technical assistance for agencies that would like to expand or refine data collection, and ongoing collaboration. In particular, future plans include developing a subsequent edition of this document.

The next edition of this document is intended to be both more complete and more thorough in its analysis. While the current edition has expanded the collective knowledge base in North Dakota, it has also revealed gaps in this knowledge base. Indeed, one of the primary purposes of this project has been to gather all available data in order to assess areas of need – areas that might need expansion of primary services, as well as those that might need expansion of data collection efforts.

When additional data is available, the second edition might be presented not only as a compilation of data, but also as an extensive research project. Results and analysis might then be generated not just within each discipline, but across disciplines.

For instance, larger research questions might be posed, questions such as “How does domestic violence in rural areas compare to domestic violence in urban areas?” This question could be addressed using data from victim service programs, batterers’ treatment programs, the criminal justice system, and other sources collectively. Results and analysis would not be encapsulated within each of these disciplines, but would represent combined knowledge gained from a variety of disciplines, and would thus reflect the state as a whole.

In its current form, this document has been an ambitious undertaking. For all involved, it has required extensive cooperation and a commitment to bringing domestic and sexual violence to an end. The North Dakota Council on Abused Women’s Services (NDCAWS) has a great deal of respect for collaborators in this project. Any comments, feedback, or suggestions can be directed to NDCAWS using the contact information on the first page.

Thank you to all who have participated in this project. May it help us see both the forest and the trees.
