

Exit Survey Results – 2021/2022

At the very end of their teacher education program at Minot State University – usually at the end of student teaching – teacher candidates are surveyed to ascertain their perceptions about the quality of the teacher preparation they received at the university. This survey, the Exit Survey, is used across the state of North Dakota by all higher education institutions that prepare teachers.

Our teacher candidates are asked a series of questions, all of which are based on the InTASC standards. These standards guide our teacher preparation program as they describe what classroom teachers should know and be able to do in all grades and in all content areas.

More information about the InTASC Standards can be found at: https://www.ccsso.org/sites/default/files/2017-12/2013_INTASC_Learning_Progressions_for_Teachers.pdf

The survey uses a Likert scale, asking our teacher education graduates to identify to what extent they agree with a statement (4 – agree, 3 – tend to agree, 2 – tend to disagree, and 1 – disagree) about the quality of the preparation they received at Minot State University. Essentially the survey asks the teacher candidates for their perceptions about the quality of our programs based on their knowledge and ability to implement the InTASC standards in a classroom (during earlier clinical experiences, practicum, and student teaching).

The table below includes the category of questions, the InTASC standards addressed by the questions in the category, the number of questions in the category, and the mean score of all responses in that category.

N=67; The following programs had an n = 0; Biology, Business, Chemistry, Early Science, math, Social Science
